Volume Contents

Number 1, January

1 Membrane Potentials of *Vallisneria* Leaf Cells and Their Relation to Photosynthesis. HIDDE B. A. PRINS, JAMES R. HARPER, AND NOE HIGINBOTHAM

6 Light-induced Changes in Allophycocyanin. ITZHAK OHAD, HANS-JÖRG A. W. SCHNEIDER, STEVEN GENDEL, AND LAWRENCE BOGORAD

13 Stimulation of Endomitotic DNA Synthesis and Cell Elongation by Gibberellic Acid in Epicotyls Grown from Gamma-irradiated Pea Seeds. ALFONS CALLEBAUT, PATRICK VAN OOSTVELDT, AND ROGER VAN PARIJS

17 Effects of Glyphosate on Metabolism of Phenolic Compounds. V. L-α-Aminooxy-β-Phenylpropionic Acid and Glyphosate Effects on Phenylalanine Ammonia-Lyase in Soybean Seedlings. STEPHEN O. DUKE, ROBERT E. HOAGLAND, AND C. DENNIS ELMORE

22 Distribution and Properties of a Potassium-dependent Asparaginase Isolated form Developing Seeds of *Pisum sativum* and Other Plants. LADASLAV SODEK, PETER J. LEA, AND BENJAMIN J. MIFLIN

27 Some New Aspects of the *in Vivo* Assay for Nitrate Reductase in Wheat (*Triticum aestivum* L.) Leaves. I. *Reevaluation of Nitrate Pool Sizes.* RICHARD H. HAGEMAN, ANDREW J. REED, RISE A. FEMMER, JOSEPH H. SHERRARD, AND MICHAEL J. DALLING

33 Resistance to Water Flow in the Sorghum Plant. WAYNE S. MEYER AND JOE T. RITCHIE

40 Regulation of Glyoxysomal Enzymes during Germination of Cucumber. 3. *In Vitro* Translation and Characterization of Four Glyoxysomal Enzymes. HOWARD RIEZMAN, ELIZABETH M. WEIR. CHRISTOPHER J. LEAVER, DAVID E. TITUS, AND WAYNE M. BECKER

47 Inhibition of Photosynthetic Electron Transport by Diphenyl Ether Herbicides. M. WAYNE BUGG, JOHN WHITMARSH, CHARLES E. RIECK, AND WILLIAM S. COHEN

51 Effect of Light, Dark, and Temperature on Root Nodule Activity (Acetylene Reduction) of Soybeans. LEE E. SCHWEITZER AND JAMES E. HARPER

57 Establishment of an Experimental System for the Study of Tracheary Element Differentiation from Single Cells Isolated from the Mesophyll of *Zinnia elegans.* HIROO FUKUDA AND ATSUSHI KOMAMINE

61 Direct Evidence for Cytodifferentiation to Tracheary Elements without Intervening Mitosis in a Culture of Single Cells Isolated from the Mesophyll of *Zinnia elegans.* HIROO FUKUDA AND ATSUSHI KOMAMINE

65 Photosynthesis As a Function of Short Day Induction and Gibberellic Acid Treatment in *Bougainvillea* "San Diego Red". ZEEV EVEN-CHEN AND ROY M. SACHS

69 *Relationship of Ribulose-1,5-bisphosphate Carboxylase-Oxygenase Specific Activity to Subunit Composition.* PATSY R. RHODES, SHAIN-DOW KUNG, AND THOMAS V. MARSHO

74 Effect of Valinomycin and Gramicidin D on the Reflection Coefficient of Soybean Root Systems, ALBERT H. MARKHART III AND AUBREY W. NAYLOR

78 Effect of Steryl Glycosides on the Phase Transition of Dipalmitoyl Lecithin. J. BRIAN MUDD AND THOMAS T. MCMANUS

81 Enzymic Mechanism of Starch Breakdown in Germinating Rice Seeds. 9. *De Novo* Synthesis of β-Amylase. KAZUO OKAMOTO AND TAKASHI AKAZAWA

85 Assessment of Cytoplasmic Contaminations in Isolated Vacuole Preparations. ARIE ADMON, BENJAMIN JACOBY, AND ELIEZER E. GOLDSCHMIDT

88 Potassium Chloride as Stomatal Osmoticum in *Allium cepa* L., a Species Devoid of Starch in Guard Cells. HEIDE SCHNABL AND KLAUS RASCHKE

94 Comparative Metabolism of 2,4-Dichlorophenoxyacetic Acid in Cotyledon and Leaf Callus from Two Varieties of Soybean. GAYLE H. DAVIDONIS, ROBERT H. HAMILTON, AND RALPH O. MUMMA

98 Heterogeneity of Zein mRNA and Protein in Maize. WILLIAM D. PARK, ELIZABETH D. LEWIS, AND IRWIN RUBENSTEIN

107 Indoleacetaldehyde Reductase of *Cucumis sativus* L. Kinetic Properties and Role in Auxin Biosynthesis. HUGH M. BROWN AND WILLIAM K. PURVES

114 Limiting Factors in Photosynthesis. I. Use of Iron Stress to Control Photochemical Capacity *in vivo*. NORMAN TERRY

121 Limiting Factors in Photosynthesis. II. Iron Stress Diminishes Photochemical Capacity by Reducing the Number of Photosynthetic Units. SUSAN SPILLER AND NORMAN TERRY

126 Biosynthesis of δ-Aminolevulinic Acid from Glutamate in *Agmenellum quadruplicatum*. JUDITH A. KIPE-NOLT AND S. EDWARD STEVENS JR.

129 Calcium is Necessary for Motility in the Diatom *Amphora coffeaeformis*. BARBARA COOKSEY AND KEITH E. COOKSEY

132 Importance of Aerodynamic Resistance to Water Use Efficiency in Three Conifers under Field Conditions. WILLIAM K. SMITH

136 Invertases in Oat Seedlings. Separation, Properties, and Changes in Activities in Seedling Segments. RUSSELL PRESSEY AND JIMMY K. AVANTS

141 Characteristics of Nitrate Reductase-inactivating Proteins Obtained from Corn Roots and Rice Cell Cultures. TOMOYUKI YAMAYA, ANN OAKS, AND INGRID L. BOESEL

146 Action of Corn and Rice-inactivating Proteins on a Purified Nitrate Reductase from *Chlorella vulgaris*. TOMOYUKI YAMAYA, LARRY P. SOLOMONSON, AND ANN OAKS

151 Cysteine Metabolism in Cultured Tobacco Cells. H. MICHAEL HARRINGTON AND IVAN K. SMITH

156 Photosynthesis in Grass Species Differing in Carbon Dioxide Fixation Pathways. III. Oxygen Response and Enzyme Activities of Species in the *Laxa* Group of *Panicum*. JACK A. MORGAN, R. HAROLD BROWN, AND BONNIE J. REGER

160 Varietal Differences in Potassium Uptake by Barley. ANTHONY D. M. GLASS AND JAMES E. PERLEY
i Instructions for Contributors

Number 2, February

165 Synthesis and Release of Cyclic Adenosine 3':5'-Monophosphate by *Ochromonas malhamensis*. RAY A. BRESSAN, AVTAR K. HANDA, HARTMUT QUADER, AND PHILIP FILNER
171 Intracellular Localization of Two Enzymes Involved in Coumarin Biosynthesis in *Melilotus alba*. JONATHAN E. POULTON, DUNCAN E. MCREE, AND ERIC E. CONN
176 Comparison of Sensitive and Desensitized Forms of Maize Homoserine Dehydrogenase. CYNTHIA A. DI-CAMELLI AND JOHN K. BRYAN
184 Crown Gall Tumor Disc Bioassay. A Possible Aid in the Detection of Compounds with Antitumor Activity. ALAN G. GALSKY, JAMES P. WILSEY, AND RICHARD G. POWELL
186 Interaction of Gibberellic Acid and Indole-3-acetic Acid in the Growth of Excised *Cuscuta* Shoot Tips *in Vitro*. RAMESH MAHESHWARI, C. SHAILINI, K. VELUTHAMBI, AND S. MAHADEVAN
193 Characteristics of Crassulacean Acid Metabolism in the Succulent C_4 Dicot, *Portulaca oleracea* L. KAREN KOCH AND ROBERT A. KENNEDY
198 Development of Enzymes Involved in Photosynthetic Carbon Assimilation in Greening Seedlings of Maize (*Zea mays*). HIROKAZU KOBAYASHI, SUMIO ASAMI, AND TAKASHI AKAZAWA
204 Control of Cell Elongation in *Nitella* by Endogenous Cell Wall pH Gradients. Multiaxial Extensibility and Growth Studies. JEAN-PIERRE MÉTRAUX, PAUL A. RICHMOND, AND LINCOLN TAIZ
211 Cell Expansion Patterns and Directionality of Wall Mechanical Properties in *Nitella*. PAUL A. RICHMOND, JEAN-PIERRE MÉTRAUX, AND LINCOLN TAIZ
218 Fractionation of Gibberellins in Plant Extracts by Reverse Phase High Performance Liquid Chromatography. M. GEORGE JONES, JAMES D. METZGER, AND JAN A. D. ZEEVAART
222 1,3-β-D-Glucanases from *Pisum sativum* Seedlings. III. Development and Distribution of Endogenous Substrates. YUK-SHAN WONG AND GORDON A. MACLACHLAN
229 Presence in Dry Pea Cotyledons of Soluble Succinate Dehydrogenase That Is Assembled into the Mitochondrial Inner Membrane during Seed Imbibition. NATSUKI NAKAYAMA, IWAO SUGIMOTO, AND TADASHI ASAHI
234 Sequence Homology between Chloroplast DNAs from Several Higher Plants. DAVID BISARO AND ALBERT SIEGEL
238 Developmental Effects of Sandoz 6706 on Activities of Enzymes of Phenolic and General Metabolism in Barley Shoots Grown in the Dark or under Low of High Intensity Light. DENISE E. BLUME AND JERRY W. MCCLURE
245 Lipid Peroxidation Associated with Accelerated Aging of Soybean Axes. ROBERT R. C. STEWART AND J. DEREK BEWLEY
249 Characteristics and Development of Leucine Transport Activity in the Scutellum of Germinating Barley Grain. TUOMAS SOPANEN, MARJUKKA UUSKALLIO, SEIJA NYMAN, AND JUHANI MIKOLA
254 Characterization of Photorespiration in Intact Leaves Using ^{13}Carbon Dioxide Labeling. JACOB SCHAEFER, LARRY D. KIER, AND EDWARD O. STEJSKAL
260 Lipid Composition and Metabolism of *Volvox carteri*. KARAN R. MOSELEY AND GUY A. THOMPSON JR.
266 Effect of Boron on the Incorporation of Glucose from UDP-Glucose into Cotton Fibers Grown *in Vitro*. W. M. DUGGER AND R. L. PALMER
274 Sulfhydryl Group Involvement in Plasmalemma Transport of HCO_3^- and OH^- in *Chara corallina*. WILLIAM J. LUCAS AND JON M. ALEXANDER
281 ATPase Activity of Pea Cotyledon Submitochondrial Particles. Activation, Substrate Specificity, and Anion Effects. CHARLES GRUBMEYER AND MARY SPENCER
286 Nitrate Uptake by Roots as Regulated by Nitrate Assimilation in the Shoot of Caster Oil Plants. ERNEST A. KIRKBY AND MICHAEL J. ARMSTRONG
291 Effects of Phaseic Acid and Dihydrophaseic Acid on Stomata and the Photosynthetic Apparatus. THOMAS D. SHARKEY AND KLAUS RASCHKE
298 Cryoprotection by Glucose, Sucrose, and Raffinose to Chloroplast Thylakoids. R. DANIEL LINEBERGER AND PETER L. STEPONKUS
305 Transcription in Isolated Wheat Nuclei. I. Isolation of Nuclei and Elimination of Endogenous Ribonuclease Activity. DAWN SYWASSINK LUTHE AND RALPH S. QUATRANO
309 Transcription in Isolated Wheat Nuclei. II. Characterization of RNA Synthesized *in Vitro*. DAWN SYWASSINK LUTHE AND RALPH S. QUATRANO
314 Pyruvate Dehydrogenase Complex from Germinating Castor Bean Endosperm. BARBARA J. RAPP AND DOUGLAS D. RANDALL
319 Inhibition of Photosynthetic Electron Transport in Isolated Spinach Chloroplasts by Two 1,3,4-Thiadiazolyl Derivatives. KRITON K. HATZIOS, DONALD PENNER, AND DUNCAN BELL
322 Xylem Transport of 1-Aminocyclopropane-1-carboxylic Acid, an Ethylene Precursor, in Waterlogged Tomato Plants. KENT J. BRADFORD AND SHANG FA YANG
327 Stress-induced Ethylene Production in the Ethylene-requiring Tomato Mutant Diageotropica. KENT J. BARDFORD AND SHANG FA YANG
331 C_4 Acid Metabolism and Dark CO_2 Fixation in a Submersed Aquatic Macrophyte (*Hydrilla verticillata*). A. SCOTT HOLADAY AND GEORGE BOWES
336 Silver Uptake, Distribution, and Effect on Calcium, Phosphorus, and Sulfur Uptake. HAROLD V. KOONTZ AND KAREN L. BERLE

340 Mechanism of Monocarpic Senescence in Rice. ARUN K. BISWAS AND MONOJIT A. CHOUDHURI
346 Photosynthesis of Grass Species Differing in Carbon Dioxide Fixation Pathways. IV. Analysis of Reduced Oxygen Response in *Panicum miliodes* and *Panicum schenckii*. R. HAROLD BROWN
350 Effects of Magnesium on Intact Chloroplasts. I. Evidence for Activation of (Sodium) Potassium/Proton Exchange Across the Chloroplast Envelope. STEVEN C. HUBER AND WENDY MAURY
355 Stimulation of Phosphatidylethanolamine Exchange by Castor Bean Cytosol Proteins. JEAN BOUSSANGE, DOMINIQUE DOUADY, AND JEAN-CLAUDE KADER
359 Cellular Distribution of Polysome Populations of Castor Bean Endosperm. ELMA GONZÁLEZ
363 Biological Effects of Cytokinin Antagonists 7-(Pentylamino) and 7-(Benzylamino)-3-Methylpyrazolo(4,3-*d*)Pyrimidines on Suspension-cultured Tobacco Cells. GIOVANNA GREGORINI AND MICHEL LALOUE
368 Polyamine-induced DNA Synthesis and Mitosis in Oat Leaf Protoplasts. RAVINDAR KAUR-SAWHNEY, HECTOR E. FLORES, AND ARTHUR W. GALSTON
372 Effects of Aminoethoxyvinylglycine and Countereffects of Ethylene on Ripening of Bartlett Pear Fruits. PENELOPE J. NESS AND ROGER J. ROMANI
377 Occurrence of Nicotinamide Adenine Dinucleotide Phosphate-linked Glyoxylate Reductase in Nonphotosynthetic Xylem Tissue of Perennials. SHONOSUKE SAGISAKA
382 Nutritional Regulation of Organelle Biogenesis in *Euglena*. Repression of Chlorophyll and NADP-Glyceraldehyde-3-Phosphate Dehydrogenase Synthesis. MARK A. HORRUM AND STEVEN D. SCHWARTZBACH
387 Xylary pH and Reduction Potential Levels of Iron-stressed Silver Maple (*Acer saccharinum* L.). ROBERT L. MORRIS AND BERT T. SWANSON
389 Oxidation of Glycine via the Respiratory Chain in Mitochondria Prepared from Different Parts of Spinach. PER GARDESTRÖM, ANDERS BERGMAN, AND INGEMAR ERICSON
392 Chlorophyll-Protein Complexes of the Cyanophyte, *Nostoc* sp. MARY RUSCKOWSKI AND BARBARA A. ZILINSKAS
397 Evidence for HCO_3^- Transport by the Blue-Green Alga (Cyanobacterium) *Coccochloris peniocystis*. ANTHONY G. MILLER AND BRIAN COLMAN
403 Concomitant Determination of Folar Nitrogen Loss, Net Carbon Dioxide Uptake, and Transpiration. R. TIMOTHY WEILAND AND CHARLES A. STUTTE
407 Peroxide Levels and the Activities of Catalase, Peroxidase, and Indoleacetic Acid Oxidase during and after Chilling Cucumber Seedlings. REFF G. OMRAN
409 Wounding Stimulates Cyanide-sensitive Respiration in the Highly Cyanide-resistant Leaves of *Bryphyllum tubiflorum* HARV. THOMAS B. KINRAIDE AND LAURA F. MAREK
411 Nodulation and Nitrogen Fixation in Cliffrose (*Cowania mexicana* var. *stansburiana* (Torr.) Jeps.). TIMOTHY L. RIGHETTI AND DONALD N. MUNNS
413 Correction

Number 3, March

415 Concentration and Metabolic Turnover of Indoles in Germinating Kernels of *Zea mays* L. EPHRAIM EPSTEIN, JERRY D. COHEN, AND ROBERT S. BANDURSKI
422 *Myo*-Inositol Esters of Indole-3-acetic Acid as Seed Auxin Precursors of *Zea mays* L. JANUSZ NOWACKI AND ROBERT S. BANDURSKI
428 Response of Leaf Water Potential, Stomatal Resistance, and Leaf Rolling to Water Stress. JOHN C. O'TOOLE AND ROLANDO T. CRUZ
433 Reduction of Nitrate via a Dicarboxylate Shuttle in a Reconstituted System of Supernatant and Mitochondria from Spinach Leaves. K. C. WOO, MARK JOKINEN, AND DAVID T. CANVIN
437 Changes in Endogenous Cytokinin Levels in Partially Synchronized Cultured Tobacco Cells. NORIKO NISHINARI AND KUNIHIKO SYŌNO
442 Oxygen and Carbon Dioxide Effects on the Pool Size of Some Photosynthetic and Photorespiratory Intermediates in Soybean (*Glycine max* [L.] Merr.). WILLIAM D. HITZ AND CECIL R. STEWART
447 Biochemical Characterization of an Acetylcholine-hydrolizing Enzyme from Bean Seedlings. MANFRED ERNST AND ELMAR HARTMANN
451 Photoactivation of Chlorophyll Synthesis and Cytochrome Oxidase Activity in Anaerobically Germinated Seedlings of *Echinochloa crusgalli* var. oryzicola. WEI-YEH WANG
455 Stomatal Response of Cotton to Water Stress and Abscisic Acid as Affected by Water Stress History. ROBERT C. ACKERSON
460 Effects of Several Tunicamycin-like Antibiotics on Glycoprotein Biosynthesis in Mung Beans and Suspension-cultured Soybean Cells. DOUGLAS W. JAMES, JR. AND ALAN D. ELBEIN
465 Simultaneous Kinetic Analysis of Ribulose 1,5-Bisphosphate Carboxylase/Oxygenase Activities. SAMUEL S. KENT AND JOSEPH D. YOUNG
469 The Absence of Protochlorophyll(ide) Accumulation in Algae with Inhibited Chlorophyll Synthesis. RICHARD J. ELLIS AND CHARLES TIMSON
472 Gibberellin-sensitive Suspension Cultures. STEPHEN C. FRY AND H. E. STREET
478 Chlorophyll Determination in Intact Tissues Using *N,N*-Dimethylformamide. RAMI MORAN AND DAN PORATH
480 Subcellular Distribution and Chemical Form of Cadmium in Bean Plants. HANS J. WEIGEL AND HANS J. JÄGER
483 Effects of Ultraviolet-B Irradiances on Soybean. II. Interaction between Ultraviolet-B and Photosynthetically Active Radiation on Net Photosynthesis, Dark Respiration, and Transpiration. ALAN H. TERAMURA, R. HILTON BIGGS, AND SUSAN KOSSUTH

489 Photosynthetic and Photorespiratory Carbon Metabolism in Mesophyll Protoplasts and Chloroplasts Isolated from Isogenic Diploid and Tetraploid Cultivars of Ryegrass (*Lolium perenne* L.). C. K. M. RATHNAM AND RAYMOND CHOLLET
495 Effect of Light on Chemical Modification of Chloroplast Ferredoxin-NADP Reductase. NESTOR CARRILLO, HÉCTOR A. LUCERO, AND RUBÉN H. VALLEJOS
499 Lethal Freeze-Dehydration Injury of Dogwood Stem Tissue Does Not Change the Activation Energy of Water Permeability. JOHN V. CARTER AND MARGARET BRADEN
502 Nitrate Effect on Nitrogen Fixation (Acetylene Reduction). Activities of Legume Root Nodules Induced by Rhizobia with Varied Nitrate Reductase Activities. JAMES R. MANHART AND PETER P. WONG
506 Cortical Air Spaces (Aerenchyma) in Roots of Corn Subjected to Oxygen Stress. Structure and Influence on Uptake and Translocation of ^{86}Rubidium Ions. MALCOLM C. DREW, ANDRÉ CHAMEL, JEAN-PAUL GARREC, AND ANDRÉ FOURCY
512 Fractionation of the Stable Isotopes of Inorganic Carbon by Seagrasses. C. ROY BENEDICT, WILLIAM W. L. WONG, AND JOSHUA H. H. WONG
518 Wheat Alcohol Dehydrogenase Isozymes. Purification, Characterization, and Gene Expression. PAT J. LANGSTON, C. NICK PACE, AND GARY E. HART
523 A Rapid Method for the Extraction and Analysis of Abscisic Acid for Plant Tissue. KERRY T. HUBICK AND DAVID M. REID
526 Energetic Factors Affecting Carbon Dioxide Fixation in Isolated Chloroplasts. RUDOLF E. SLOVACEK AND GEOFFREY HIND
533 Gravity Functions of Circumnutation by Hypocotyls of *Helianthus annuus* in Simulated Hypogravity. DAVID K. CHAPMAN, ALLEN L. VENDITTI, AND ALLAN H. BROWN
537 Abscisic Acid Promotes Both Volume Flow and Ion Release to the Xylem in Sunflower Roots. ZVI GLINKA
541 Nutrient Influences on Leaf Photosynthesis. Effects of Nitrogen, Phosphorous, and Potassium for *Gossypium hirsutum* L. DAVID. J. LONGSTRETH AND PARK S. NOBEL
544 Effect of Salinity upon Cell Membrane Potential in the Marine Halophyte, *Salicornia bigelovii* Torr. ALAN L'ROY AND DONALD L. HENDRIX
550 Energization of the Sugar Transport Mechanism in the Plasmalemma of Isolated Mesophyll Protoplasts. MICHA GUY, LEONORA REINHOLD, AND MICHAELA RAHAT
554 Some Synthetic Phytotoxins Structurally Related to Rhynchosporoside. J. PIO BELTRAN, GARY A. STROBEL, ROSS BEIER, AND BRADFORD P. MUNDY
557 Lipopolysaccharide Composition of the Wilt Pathogen, *Pseudomonas solanacearum*. Correlation with the Hypersensitive Response in Tobacco. MARIAMNE H. WHATLEY, NORA HUNTER, MICHAEL A. CANTRELL, CAROL HENDRICK, KENNETH KEEGSTRA, AND LUIS SEQUEIRA
560 Translocation. Efflux of Sugars across the Plasmalemma of Mesophyll Protoplasts. STEVEN C. HUBER AND DONALD E. MORELAND
563 Effect of Cold on Endogenous Fucosyl Transferase Activity in Corn Roots. DOUGLAS W. JAMES, JR., AND RUSSELL L. JONES
566 Heterotrophic Carbon Dioxide Fixation Products of *Euglena*. Effects of Ammonium. JENNIFER G. PEAK, MEYRICK J. PEAK, AND IRWIN P TING

Number 4, April

569 Photomorphogenically Defined Light and Resistance of *Poa pratensis* to *Drechslera sorokiniana*. KARL N. NILSEN AND CLINTON F. HODGES
574 Balance between Metabolite Accumulation and Transport in Relation to Photosynthesis by Isolated Spinach Chloroplasts. U. INGO FLÜGGE, MARTHA FREISL, AND HANS W. HELDT
578 Vein Loading in Seedlings of *Phaseolus vulgaris* Exposed to Excess Cobalt, Nickel, and Zinc. WILFRIED E. RAUSER AND ANANDA B. SAMARAKOON
584 Photosynthetic Rates of Sporophytes and Gametophytes of the Fern, *Todea barbara*. WILLIAM G. HAGAR AND JOHN A. FREEBERG
587 Adenosine Phosphate and Nicotinamide Adenine Dinucleotide Pool Sizes during Shoot Initiation in Tobacco Callus. DANIEL C. W. BROWN AND TREVOR A. THORPE
591 Oxidation of Reduced Nicotinamide Adenine Dinucleotide Phosphate by Potato Mitochondria. Inhibition by Sulfhydryl Reagents. GEOFFREY P. ARRON AND GERALD E. EDWARDS
595 Development of NAD(P)H: and NADH:Nitrate Reductase Activities in Soybean Cotyledons. BENITO ORIHUEL-IRANZO AND WILBUR H. CAMPBELL
600 Endoplasmic Reticulum of Mung Bean Cotyledons. Accumulation during Seed Maturation and Catabolism during Seedling Growth. NEIL R. GILKES AND MAARTEN J. CHRISPEELS
605 Oxyleghemoglobin-mediated Hydrogen Oxidation by *Rhizobium japonicum* USDA 122 DES Bacteroids. DAVID W. EMERICH, STEVE L. ALBRECHT, STERLING A. RUSSELL, TEMAY CHING, AND HAROLD J. EVANS
610 Organic Acids and Ionic Balance in Xylem Exudate of Wheat during Nitrate or Sulfate Absorption. ERIC W. TRIPLETT, NEAL M. BARNETT, AND DALE G. BLEVINS
614 Measurement of Tissue Osmotic Pressure. WILLIAM WENKERT
618 Legume α-Galactosidases Which Have Hemagglutinin Properties. CHARLES N. HANKINS, JUANITA I. KINDINGER, AND LELAND M. SHANNON
623 Identification of Six Endogenous Gibberellins in Spinach Shoots. JAMES D. METZGER AND JAN A. D. ZEEVAART
627 Variation in the Accumulation of Seed Storage Protein Among Genotypes of *Phaseolus vulgaris* (L.). MARTHA A. MUTSCHLER, FREDERICK A. BLISS, AND TIMOTHY C. HALL

631 Effect of Light on Glucose Utilization by *Euglena gracilis*. PAUL NICOLAS, GEORGES FREYSSINET, AND VICTOR NIGON
635 Soil Temperature Influences on Root Resistance of *Pinus contorta* Seedlings. STEVEN W. RUNNING AND C. PATRICK REID
641 Light Effects on the Synthesis of Ribulose-1,5-Bisphosphate Carboxylase in *Lemna gibba* L. G-3. ELAINE M. TOBIN AND JANET L. SUTTIE
648 Glycosylation of Pea Cotyledon Membranes. JERRY NAGAHASHI, STEVE K. BROWDER, AND LEONARD BEEVERS
658 Photoreversible Calcium Fluxes Induced by Phytochrome in Oat Coleoptile Cells. CALVIN C. HALE II AND STANLEY J. ROUX
663 Plastid Protease Activity and Prolamellar Body Transformation during Greening. RÜDIGER HAMPP AND LUIGI F. DE FILIPPIS
669 Alternative Respiratory Pathway. Its Role in Seed Respiration and Its Inhibition by Propyl Gallate. JAMES N. SIEDOW AND MARK E. GIRVIN
675 Malate Decarboxylation by *Kalanchoë daigremontiana* Mitochondria and Its Role in Crassulacean Acid Metabolism. DAVID A. DAY
680 Influence of Cell Age on Chlorophyll Formation in Light-grown and Etiolated Wheat Seedlings. STEPHEN A. BOFFEY, GUN SELLDÉN, AND RACHEL M. LEECH

* * * * *

685 Photophosphorylation in Isolated Maize Bundle Sheath Chloroplasts and Cells. GRIFFIN H. WALKER AND SEIKICHI IZAWA
691 Dependence of Delayed Luminescence upon Adenosine Triphosphatase Activity in *Chorella*. PIERRE JOLIOT AND ANNE JOLIOT
697 Electron Donation to Photosystem I. DAN J. DAVIS, DAVID W. KROGMANN, AND ANTHONY SAN PIETRO
703 Regulation of Photosynthetic Electron Transport in Intact Spinach Chloroplasts. I. Influence of Exogenous Salts on Oxaloacetate Reduction. THOMAS V. MARSHO, PATRICIA M. SOKOLOVE, AND A. BRYAN MACKAY
707 Mechanism of Linolenic Acid-induced Inhibition of Photosynthetic Electron Transport. JOHN H. GOLBECK, IRIS F. MARTIN, AND CHARLES F. FOWLER
714 Effects of Chromatic Adaptation on the Photochemical Apparatus of Photosynthesis in *Porphyridium cruentum*. ARTHUR C. LEY AND WARREN L. BUTLER
723 Light-driven Uptake of Oxygen, Carbon Dioxide, and Bicarbonate by the Green Alga *Scenedesmus*. RICHARD RADMER AND OTTO OLLINGER
730 A Light-dependent Protein Kinase Activity of Chloroplasts. RAMONA ALFONZO, NATHAN NELSON, AND EFRAIM RACKER
735 Flash Inactivation of Oxygen Evolution. Identification of S_2 as the Target of Inactivation by Tris. WAYNE D. FRASCH AND GEORGE M. CHENIAE
746 A Method for Enzymic Extraction and the Measurement of Chloroplast RNA. LEONARD FISH AND ANDRÉ T. JAGENDORF
751 On the Quenching of the Fluorescence Yield in Photosynthetic Systems. RIENK VAN GRONDELLE AND LOUIS N. DUYSENS
755 Influence of Hydrogen Peroxide upon Carbon Dioxide Photoassimilation in the Spinach Chloroplast. I. Hydrogen Peroxide Generated by Broken Chloroplasts in an "Intact" Chloroplast Preparation is a Causal Agent of the Warburg Effect. J. MICHAEL ROBINSON, MARSHA G. SMITH, AND MARTIN GIBBS

Number 5, May

761 Biological Activities of Indoleacetylamino Acids and Their Use as Auxins in Tissue Culture. ROGER P. HANGARTER, MICHAEL D. PETERSON, AND NORMAN E. GOOD
768 β-D-Glucan Hydrolase Activity in *Zea* Coleoptile Cell Walls. DONALD J. HUBER AND DONALD J. NEVINS
774 Utilization of Exogenous Inorganic Carbon Species in Photosynthesis by *Chlorella pyrenoidosa*. BARRY J. SHELP AND DAVID T. CANVIN
780 Photorespiration and Oxygen Inhibition of Photosynthesis in *Chlorella pyrenoidosa*. BARRY J. SHELP AND DAVID T. CANVIN
785 A Comparison of Purified Host Specific Toxin from *Helminthosporium maydis*, Race T, and Its Acetate Derivative on Oxidation by Mitochondria from Susceptible and Resistant Plants. GARY PAYNE, Y. KONO, AND JOSEPH M. DALY
792 Day/Night Changes in the Sensitivity of Phosphoenolpyruvate Carboxylase to Malate during Crassulacean Acid Metabolism. KLAUS WINTER
797 Influence of Light and Temperature on Monoterpene Emission Rates from Slash Pine. DAVID T. TINGEY, MARYBETH MANNING, LOUIS C. GROTHAUS, AND WALTER F. BURNS
802 Carbon Dioxide Fixation and Related Properties in Sections of the Developing Green Maize Leaf. JOHN T. PERCHOROWICZ AND MARTIN GIBBS
810 Salt-induced Metabolic Changes in *Dunaliella salina*. AARON KAPLAN, ULRICH SCHREIBER, AND MORDHAY AVRON
814 Chlorophyll Proteins of Photosystem I. JOHN E. MULLET, JOHN J. BURKE, AND CHARLES J. ARNTZEN
823 A Developmental Study of Photosystem I Peripheral Chlorophyll Proteins. JOHN E. MULLET, JOHN J. BURKE, AND CHARLES J. ARNTZEN
828 Ribulose-1,5-bisphosphate Carboxylase/Oxygenase and Polyphenol Oxidase in the Tobacco Mutant *Su/su* and Three Green Revertant Plants. PAUL J. KOIVUNIEMI, N. EDWARD TOLBERT, AND PETER S. CARLSON

834 Partial Purification and Characterization of the mRNA for α-Amylase from Barley Aleurone Layers. THOMAS J. MOZER
838 Biochemical and Cytological Analyses of RNA Synthesis in Kinetin-treated Pea Root Parenchyma. TERRY L. SHININGER
844 Starch Depletion and Sugars in Developing Cotton Leaves. CHONG W. CHANG
848 An Apparent Anomaly in Peanut Leaf Conductance. JAMES E. PALLAS, JR.
852 Endogenous Cytokinins in *Bougainvillea* "San Diego Red". I. Occurrence of Cytokinin Glucosides in the Root Sap. JOHANNES VAN STADEN AND GERARD G. DIMALLA
855 Metabolism of Oak Leaves during Senescence. VI. Changes in ATP Levels. NASIR S. A. MALIK AND KENNETH V. THIMANN
860 Calcium Inhibition of Pyrophosphatase in Crude Plant Extracts. Implication of Soluble Calcium in C_4 Photosynthesis. NIKOS A. GAVALAS AND YIANNIS MANETAS
864 Movement of ^{14}C-labeled Assimilates into Kernels of *Zea mays* L. III. An Anatomical Examination and Microautoradiographic Study of Assimilate Transfer. FREDERICK C. FELKER AND JACK C. SHANNON
871 Characterization of Soybean Plasma Membrane during Development. Free Sterol Composition and Concanavalin A Binding Studies. ROBERT L. TRAVIS AND ROBERT L. BERKOWITZ
880 Light and the Correlation of Chloroplast Development and Coupling of Phosphorylation to Electron Transport. MURRAY E. DUYSEN, THOMAS P. FREEMAN, AND RONALD D. ZABROCKI
884 Stomatal Closure and Photosynthetic Inhibition in Soybean Leaves Induced by Petiole Girdling and Pod Removal. TIM L. SETTER, WILLIAM A. BRUN, AND MARK L. BRENNER
888 The Effect of Glyoxylate on Photosynthesis and Photorespiration by Isolated Soybean Mesophyll Cells. DAVID J. OLIVER
893 Pyrimidine Pathway in Boron-deficient Cotton Fiber. IRENE M. WAINWRIGHT, RAYMOND L. PALMER, AND W. MACK DUGGER
897 Glyceraldehyde-3-Phosphate Dehydrogenase in Greening *Zea mays* L. Leaves. CHIN HO LIN AND C. RALPH STOCKING
902 Distribution of Metabolites between Chloroplast and Cytoplasm during the Induction Phase of Photosynthesis in Leaf Protoplasts. SIMON P. ROBINSON AND DAVID A. WALKER
906 *Lemna paucicostata* Hegelm. 6746. Development of Standardized Growth Conditions Suitable for Biochemical Experimentation. ANNE H. DATKO, S. HARVEY MUDD, AND JOHN GIOVANELLI
913 *Lemna paucicostata* Hegelm. 6746. Life Cycle and Characterization of the Colony Types in a Population. ANNE H. DATKO, S. HARVEY MUDD, AND JOHN GIOVANELLI
924 Incorporation of [^{14}C]Glucosamine and [^{14}C]Mannose into Glycolipids and Glycoproteins in Cotyledons of *Pisum sativum* L. STEVE K. BROWDER AND LEONARD BEEVERS
931 Solubilization and Partial Purification of the Adenosine Triphosphatase from a Corn Root Plasma Membrane Fraction. FRANCES M. DUPONT AND ROBERT T. LEONARD
939 Synthesis of Nitrate Reductase in *Chlorella*. I. Evidence For An Inactive Protein Precursor. EDWARD A. FUNKHOUSER, TEH-CHIEN SHEN, AND RENATE ACKERMANN
944 Synthesis of Nitrate Reductase in *Chlorella*. II. Evidence for Synthesis in Ammonia-grown Cells. EDWARD A. FUNKHOUSER AND CANDADAI S. RAMADOSS
949 Purification and Characterization of the Crown Gall-specific Enzyme, Octopine Synthase. ETHAN HACK AND JOHN D. KEMP
956 ATP Requirement for Mg Chelatase in Developing Chloroplasts. ANTHONY D. PARDO, BARBARA M. CHERESKIN, PAUL A. CASTELFRANCO, VINCENT R. FRANCESCHI, AND BARBARA E. WEZELMAN
961 Nitrogen Nutrition and Xylem Transport of Nitrogen in Ureide-producing Grain Legumes. JOHN S. PATE, CRAIG A. ATKINS, SHANE T. WHITE, ROSS M. RAINBIRD, AND K. C. WOO
966 Electrical Membrane Properties and Circadian Rhythm in Extensor Cells of the Laminar Pulvini of *Phaseolus coccineus* L. CRESCENTIA FREUDLING, WALTER-ERICH MAYER, AND DIETRICH GRADMANN
969 ATP Levels and Their Effects on Plasmalemma Influxes of Potassium Chloride in Red Beet. TERESA PETRAGLIA AND RONALD J. POOLE
973 Effect of Anoxia on ATP Levels and Ion Transport Rates in Red Beet. TERESA PETRAGLIA AND RONALD J. POOLE
975 Kinetics of ^{14}C-Photosynthate Uptake by Developing Soybean Fruit. JOHN H. THORNE
980 Effect of Oxygen and Temperature on the Efficiency of Photosynthetic Carbon Assimilation in Two Microscopic Algae. JOHN R. COLEMAN AND BRIAN COLMAN
984 Reduction of Nitrate and Nitrite in Lambsquarters (*Chenopodium album*) Biotypes Resistant and Susceptible to Atrazine Toxicity. JOHN M. LAWRENCE, ROBERT J. FOSTER, AND HEDWIG E. HERRICK
990 *In Vitro* Synthesis of the α and α′ Subunits of the 7S Storage Proteins (Conglycinin) of Soybean Seeds. ROGER N. BEACHY, KENNETH A. BARTON, JOHN F. THOMPSON, AND JAMES T. MADISON
995 Slow Adaptive Changes in Urease Levels of Tobacco Cells Cultured on Urea and Other Nitrogen Sources. THOMAS A. SKOKUT AND PHILIP FILNER
1004 Membrane Potential Changes Related to Active Transport of Glycine in *Lemna gibba* G1. ELKE FISCHER AND ULRICH LÜTTGE
1009 Cell Wall Metabolism in Ripening Fruit. I. Cell Wall Changes in Ripening 'Bartlett' Pears. AHMED ELRAYAH AHMED AND JOHN M. LABAVITCH
1014 Cell Wall Metabolism in Ripening Fruit. II. Changes in Carbohydrate-degrading Enzymes in Ripening 'Bartlett' Pears. AHMED ELRAYAH AHMED AND JOHN M. LABAVITCH
1017 Localization of Glycerate Kinase and Some Enzymes for Sucrose Synthesis in C_3 and C_4 Plants. HIDEAKI USUDA AND GERALD E. EDWARDS

1023 Reduction of Auxin Transport Capacity with Age and Internal Water Deficits in Cotton Petioles. THOMAS L. DAVENPORT, PAGE W. MORGAN, AND WAYNE R. JORDAN

Number 6, June, 1980

1027 Desaturation of Oleic and Linoleic Acids by Leaves of Dark- and Light-grown Maize Seedlings. JOHN C. HAWKE AND PAUL K. STUMPF
1031 Relationship between Chloroplast Development and *ent*-Kaurene Biosynthesis in Peas. JOHN S. CHOINSKI, JR. AND THOMAS C. MOORE
1036 Dark Opening of Stomates of *Vicia faba* in CO_2-free Air. Effect of Temperature on Stomatal Aperture and Potassium Accumulation. CYNTHIA ROGERS, PETER J. H. SHARPE, AND ROBERT D. POWELL
1039 Characterization of an Acyl-Coenzyme A Thioesterase Associated with the Envelope of Spinach Chloroplasts. JACQUES JOYARD AND PAUL K. STUMPF
1044 Photosynthesis in Isolated Chloroplasts of the Crassulacean Acid Metabolism Plant *Sedum praealtum*. MARTIN H. SPALDING AND GERALD E. EDWARDS
1049 Interactions between Rhizobia and Lectins of Lentil, Pea, Broad Bean, and Jackbean. PETER P. WONG
1053 Labeling and Isolation of Plasma Membranes from Corn Leaf Protoplasts. DAVID S. PERLIN AND ROGER M. SPANSWICK
1058 Comparison of the Ability of Salicylic Acid and Ferricyanide to Induce Flowering in the Long-day Plant, *Lemna Gibba* G3. OSAMU TANAKA AND CHARLES F. CLELAND
1062 Role of Hydration State and Thiol-Disulfide Status in the Control of Thermal Stability and Protein Synthesis in Wheat Embryo. ROBERT C. FAHEY, DEENA L. DI STEFANO, G. PATRICK MEIER, AND ROBERT N. BRYAN
1067 Ethylene Action and Loss of Membrane Integrity during Petal Senescence in *Tradescantia*. JEFFREY C. SUTTLE AND HANS KENDE
1073 Analysis of Glycoconjugate Saccharides in Organelles Isolated from Castor Bean Endosperm. ROBERT B. MELLOR, TOM KRUSIUS, AND J. MICHAEL LORD
1076 Transverse Distribution of Phospholipids in Organelle Membranes from *Ricinus communis* L. var. Hale Endosperm. Mitochondria and Glyoxysomes. THOMAS M. CHEESBROUGH AND THOMAS S. MOORE, JR.
1081 Synthesis of Isocitrate Lyase in Sunflower Cotyledons during the Transition in Cotyledonary Microbody Function. URSULA FRANZISKET AND BERNT GERHARDT
1085 Electrical Evidence for Different Mechanisms of Uptake for Basic, Neutral, and Acidic Amino Acids in Oat Coleoptiles. THOMAS B. KINRAIDE AND BUD ETHERTON
1090 Kinetics of N^6-(Δ^2-Isopentenyl)Adenosine Degradation in Tobacco Cells. Evidence of a Regulatory Mechanism Under the Control of Cytokinins. CLAUDE TERRINE AND MICHEL LALOUE
1096 Temperature Effects on Soybean Imbibition and Leakage. A. CARL LEOPOLD
1099 Protoplast Fusion. Effect of Low Temperature on the Membrane Fluidity of Cultured Cells. YASUYUKI YAMADA, YASUHIRO HARA, HIROAKI KATAGI, AND MITSUGI SENDA
1103 Photosynthesis, Leaf Resistances, and Ribulose-I,5-Bisphosphate Carboxylase Degradation in Senescing Barley Leaves. JAMES W. FRIEDRICH AND RAY C. HUFFAKER
1108 Biochemical Studies on the *Iojap* Mutant of Maize. ANKE SIEMENROTH, THOMAS BÖRNER, AND ULRICH METZGER
1111 Effect of Obstructed Translocation on Leaf Abscisic Acid, and Associated Stomatal Closure and Photosynthesis Decline. TIM L. SETTER, WILLIAM A. BRUN, AND MARK L. BRENNER
1116 Alterations in Source-Sink Patterns by Modifications of Source Strength. CHARLOTTE BORCHERS-ZAMPINI, ANN BAILEY GLAMM, JOHN HODDINOTT, AND CARROLL A. SWANSON
1121 Reassociation Kinetics and Cytophotometric Characterization of Peanut (*Arachis hypogaea* L.) DNA. SUKHRAJ S. DHILLON, ADRIAN V. RAKE, AND JEROME P. MIKSCHE
1128 Preformed mRNA in Cotyledons of Ungerminated Seeds of *Cicer arietinum* L. ANGEL MATILLA, GREGORIO NICOLÁS, OSCAR VICENTE, AND JOSÉ MANUEL SIERRA
1133 Direct Measurement of Sieve Tube Turgor Pressure Using Severed Aphid Stylets. JOHN P. WRIGHT AND DONALD B. FISHER
1136 Conceptual Error in Determination of NAD^+-Malic Enzyme in Extracts Containing NAD^+-Malic Dehydrogenase. WILLIAM H. OUTLAW, JR. AND JILL MANCHESTER
1139 Effect of ATPase Inhibitors on Cell Potential and K^+ Influx in Corn Roots. JOHN M. CHEESEMAN, PETER R. LAFAYETTE, JOHN W. GRONEWALD, AND JOHN B. HANSON
1146 Characteristics of Cold Acclimation and Deacclimation in Tuber-bearing *Solanum* Species. HWEI-HWANG CHEN AND PAUL H. LI
1149 Effects of Temperature, Water Potential, and Light on Germination Responses of Redroot Pigweed Seeds to Ethylene. MARK W. SCHONBECK AND GRANT H. EGLEY
1155 RNA Synthesis in Germinating Embryonic Axes of Soybean and Wheat. BOR-FUEI HUANG, SHIRLEY J. RODAWAY, ALLAN WOOD, AND ABRAHAM MARCUS
1160 Forms of Dissolved Carbon Dioxide Required for Photosystem II Activity in Chloroplast Membranes. ALAN STEMLER
1166 Photosynthetic Formation of the Aspartate Family of Amino Acids in Isolated Chloroplasts. W. RONALD MILLS, PETER J. LEA, AND BENJAMIN J. MIFLIN
1173 Loss of Sensitivity to *Helminthosporium maydis* Race T Toxin during Aging of Mitochondria Isolated from Texas Cytoplasm Corn. HIEP N. PHAM AND PETER GREGORY
1176 Spherosomes of Castor Bean Endosperm. Membrane Components, Formation, and Degradation. ROBERT A. MOREAU, KITTY D. F. LIU, AND ANTHONY H. C. HUANG

1181 Effect of Light Intensity during Growth on Photoinhibition of Intact Attached Bean Leaflets. STEVE B. POWLES AND CHRISTA CRITCHLEY
1188 Characterization and Kinetics of Isoenzymes of Pyruvate Kinase from Developing Castor Bean Endosperm. ROBERT J. IRELAND, VINCENZO DE LUCA, AND DAVID T. DENNIS
1194 Thymidine Metabolism and the Measurement of the Rate of DNA Synthesis in Carrot Suspension Cultures. Evidence for a Degradation Pathway for Thymidine. ANTONI R. SLABAS, GILLIAN MACDONALD, AND CLIVE W. LLOYD
1199 Metabolism of Hydrogen Cyanide by Higher Plants. JACQUELINE M. MILLER AND ERIC E. CONN
1203 Allantoic Acid Synthesis in Soybean Root Nodule Cytosol via Xanthine Dehydrogenase. ERIC W. TRIPLETT, DALE G. BLEVINS, AND DOUGLAS D. RANDALL
1207 Mitochondrial DNA from *Oenothera berteriana*. Purification and Properties. AXEL BRENNICKE
1211 Effects of Calcium on Chlorophyll Synthesis and Stability in the Early Phase of Greening in Cucumber Cotyledons. AYUMI TANAKA AND HIDEO TSUJI
1216 Use of High Performance Liquid Chromatography for the Determination of Endogenous Hormone Levels of *Solanum tuberosum* L. Subjected to Carbon Dioxide Enrichment of the Root Zone. RICHARD N. ARTECA, B. W. POOVAIAH, AND ORRIN E. SMITH
1220 Inhibition of Respiration and Ion Uptake by 2,3,5-Triiodobenzoic Acid in Excised Barley Roots. ANDREW JACOBSON AND LOUIS JACOBSON
1224 Incorporation and Degradation of ^{14}C and ^{3}H-labeled Thymidine by Sugarcane Cells in Suspension Culture. STANLEY M. LESLEY, ANDREW MARETZKI, AND LOUIS G. NICKELL
1229 A Simple Autoradiographic Technique for Studying Diffusion of Water into Seeds. G. MICHAEL JACKSON AND ELIZABETH VARRIANO-MARSTON

Subject Index

A

Abaxial
  leaf surface, photosynthesis, 848
Abscisic acid
  extraction and analysis, 523
  promotion of volume flow and ion release to xylem, 537
  stomatal sensitivity to, in water stress, 455
Acer saccharinum L., Fe and pH stress, 387
Acetylcholinesterase, biochemical characterization, 447
Acid, acidic amino, mechanisms of uptake, oat, 1085
Acyl-CoA thioesterase, hydrolysis in spinach chloroplast, 1039
Adenosine 3′:5′-monophosphate cyclic, in enzyme synthesis, 165
Adenosine 5′-triphosphate
  activity in submitochondrial particles, 281
  during senescence, oat leaf, 855
  effect of anoxia, red beet, 973
  effect on plasmalemma influx, red beet, 969
  generating system, 956
  inhibitors, effect on cell potential and K^+ influx, 1139
  solubilization and purification, corn root, 931
Aeration, effect on plant growth and ion accumulation, 506
Aerobic and anaerobic seedling germination, 451
Aerodynamic resistance to water vapor, in conifers, 132
Age, effect on carbon dioxide fixation in maize tissue, 802
Agmenellum quadruplicatum, incubation of, δ-aminolevulinic acid accumulation, 126
Agrobacterium tumefaciens, crown gall tumor agent, 184
Alga
  cellular differentiation, 260
  HCO_3^- transport, 397
  mechanism of locomotion, 129
  oxygen and temperature effect, 980
Allium cepa L., potassium chloride as stomatal osmoticum, 88
Allophycocyanin, light-induced changes in, 6
Amino acid synthesis
  aspartate derived, 1166
  octopine synthase, 949
1-Aminocyclopropane-1-carboxylic acid, in ethylene synthesis, 322
Aminoethoxyvinylglycine, effect on ripening, pear fruit, 372
δ-Aminolevulinic acid, biosynthesis, in *Agmenellum quadruplicatum*, 126
Aminolevulinic acid synthesis, retardation by protochlorophyllide, 469
L-α-Aminooxy-β-phenylpropionic acid, effects on phenylalanine ammonialyase, soybean seedlings, 17
Amphora coffeaeformis locomotion, 129
Amylase in breakdown of reserve starch, 81
α-Amylase
  mRNA for, 834
Antenna and reaction center, energy transfer, 751
Arachis hypogaea L. (*see* peanut)
Asparaginase, potassium-dependent, isolation in *Pisum sativum*, 22
Aspartic acids, photosynthetic formation, 1166
Assimilate
  transfer, into kernels of *Zea mays* L., 864
  transport effect of source-sink parameter changes, 1116
Atrazine toxicity, lambsquarters, 984
Autolysis, cell wall, 768
Autoradiography, diffusion of water into seeds, 1229
Auxin
  activity of indoleacetylamino acid, 761
  indoleacetaldehyde reductase in biosynthesis, 107
  transport capacity, in cotton petioles, 1023

B

Barley
  development of uptake system, 249
  loss of RuBPCase during leaf senescence, 1103
  potassium uptake, 160
  respiration and ion-uptake inhibition in root, 1220
  Sandoz 6706 effect on enzyme activity, 238
  synthesis and secretion of hydrolases in aleurone layers, 834
Bean
  photoinhibition, effect of light intensity during growth, 1181
  plants cadmium accumulation, 480
  silver toxicity, 336
Bean (*see also* legume; specific bean)
Beta vulgaris L.
  ATP level
    ion transport, 973
    effect on plasma-lemma influx of potassium chloride, 969
  control of photochemical capacity, 114, 121
Bicarbonate, light-driven uptake by green alga, 723
Biosynthetic pathways in plants, 906
Boron
  deficiency in cotton fiber, 893
  role in plant growth, 266
Bougainvillea
  cytokinin activity in root sap, 852
  short day induction and gibberellic acid treatment in, 65
Bryophyllum tubiflorum Harv., wounding and respiration rate, 409
Buthidazol photosynthesis inhibition, 319

C

$\delta^{13}C$ values, for seagrasses, 512
^{14}C labeling distribution of products during photosynthesis, wheat, 902
  photosynthate uptake kinetics, soybean, 975
C_3 plants
  determining $\delta^{13}C$ value, 512
  sucrose synthesis, 1017
C_4
  acid metabolism in *Hydrilla*, 331
  plants, sucrose synthesis, 1017
Cadmium, subcellular distribution and chemical form, in bean plants, 480
Calcium
  Amphora coffeaeformis motility, 129
  effect on chlorophyll synthesis, cucumber, 1211
  inhibition of pyrophosphatase activity, 860
Calvin cycle
  CO_2 assimilation, maize plants, 802
  during carbon dioxide fixation, 526
Carbon
  inorganic
    fractionation of stable isotopes, seagrass, 512
    photosynthesis, 774
  metabolism, in mesophyll protoplasts and chloroplasts, ryegrass, 489
Carbon dioxide
  effect on pool size in photosynthesis and photorespiration, 442
  fixation
    inhibition factors, 526
    leaf age influence, maize, 802
    metabolic products of fixation, *Euglena*, 566
    pathways, grass species, 156
  inhibition of photosynthesis, 346
  labeling, in photorespiration, 254
  light driven uptake by green alga, 723
  photosystem II requirement, 1160
  root zone enrichment, potato, 1216
Carboxylase
  activity, of ribulose 1,5-biphosphate, 465
  specific activity in *Nicotiana*, 69
Carrot, thymidine metabolism, 1194
Castor bean
  endosperm
    developmental pattern, 1176
    isozyme isolation, 1188
  glycoconjugate saccharides in endosperm of, 1073
Castor bean (*see* also *Ricinus communis*)
Catalase
  activity during chilling, cucumber, 407
  detection in wheat germ system, by monospecific antibodies, 40
Cell
  age, influence on chlorophyll formation, wheat, 680
  division, relationship to exogenous cytokinin, 437
  elongation, by gibberellic acid, in pea epicotyls, 13
  extensor, circadian changes, 966
  fractionation, succinate dehydrogenase activity, 229
  membrane
    depolarization, oat, 1085
    potential and salinity, marine plant, 544
  photosynthetic electron transport, maize, 685
  potassium chloride as stomatal osmoticum, 88
  potential, effect of ATPase inhibitors, 1139

single, tracheary element differentiation study from *Zinnia elegans*, 57
temperature effect on membrane fluidity, 1099
Cell wall
elongation control, in *Nitella*, 204
expansion process, evaluation of low pH in, 211
metabolism in ripening fruit, 1009, 1014
Chara Corallina, $H^{14}CO_3^-$ assimilation, 274
Chenopodium album (see lambsquarters)
Chilling injury, cucumber seedlings, 407
Chlorella pyrenoidosa
delayed luminescence and fluorescence yield, 691
inhibition of photosynthesis, 780
photosynthesis, in algae, 774
Chlorella vulgaris
nitrate reductase synthesis, 939, 944
protein action on nitrate reductase, 146
Chlorophyll
a, antennae of photosystem I, 823
calcium inhibition of accumulation, cucumber, 1211
determination using *N,N*-dimethylformamide, 478
formation, cell age influence, wheat, 680
light-induced biosynthesis, 198
proteins in photosystem I preparation, 814
synthesis blocking, 469
effect of illumination on, 451
nutritional repression, 382
Chlorophyll-protein complex, *Nostoc* sp. and spinach thylakoid separation, 392
Chloroplast
amino acid formation, 1166
bundle sheath, and phosphorylation, maize, 685
chemical modification, spinach, 495
DNA, sequence homology presence in, 234
isolation, in *Spinacia oleracea*, 350
kaurene synthesis and, 1031
lipid metabolism, spinach leaf, 1039
membranes, photosystem II activity, 1160
photosynthesis in Crassulacean acid metabolism plant, 1044
RNA, extraction and measurement, 746
ultraviolet-B radiation injury, 483
Cholinesterasex plant and animal, 447
Chromatic adaptation, effect on photosynthesis in *Porphyridium cruentum*, 714
Chromatography
high performance liquid, in hormone level determination, 1216
liquid, high performance reverse phase in gibberellin fractionation, 218
Cicer arietinum L., preformed mRNA, 1128
Circadian rhythm, and electrical membrane properties in *Phaseolus coccineus* L., 966
Circumnutation gravity functions, 533
CO_2
compensation points, algae, 980
fixation products released by spinach chloroplasts, 574
fixation rate in aquatic macrophyte, 331
Cold
acclimation, potato, 1146
effect on fucosyl transferase activity, 563
Colony, *Lemna*, life cycle, 913
Conductance, peanut leaf, anomaly, 848
Conglycinin synthesis, soybean, 990
Conifers, aerodynamic resistance to H_2O vapor, 132
Contamination, cytoplasmic, in isolated vacuole, 85
Corn
characterization of photorespiration, 254
leaf protoplast labeling and isolation of plasma membrane, 1053
oxygen stressed, air space in roots, 506
root,
ATPase solubilization and purification in, 931
electrogenic potentials, 1139
nitrate reductase inactivating proteins from, 141
silver toxicity, 336
toxin sensitivity loss, 1173
Cornus sericea (see dogwood)
Correction—Vol. 64:236–240.1979
Cotton
auxin transport capacity, 1023
ovules, boron insufficiency, 893
starch depletion and sugar, 844
Coumarin, biosynthesis in *Melilotus alba*, 171
Counterions for K^+ translocation in xylem of wheat, 610
Crassulacean acid metabolism
CO_2 assimilation, 1044
phosphoenolpyruvate carboxylase sensitivity to malate, 792
Portulaca oleracea L., 193
role of malate decarboxylation, *Kalanchoë*, 675
Crown gall tumor, in antitumor activity detection, 184
Cryoprotection to chloroplast thylakoids, 298
Cucumber
calcium in chlorophyl synthesis, 1211
glyoxysomal enzyme detection, 40
Cucumis sativus L., indoleacetaldehyde reductase activity in, 107
Cultures, suspension, gibberellic acid incubation, 472
Cuscuta chinensis, interactions of growth hormones in, 186
Cyanide metabolism by enzymes, 1199
β-cyanoalanine synthase in cyanide metabolism, 1199
Cyanophytes, chlorophyll-protein complexes, 392
Cysteine, tobacco cell metabolism, 151
Cytochrome oxidase activity in anaerobically germinated seedlings, 451
Cytodifferentiation, tracheary element, 61
Cytokinin
activity, root sap of *Bougainvillea*, 852
antagonists, effect on tobacco cells, 363
degradation in tobacco cells, 1090
exogenous, and cell division, 437
Cytosol
allantoic acid synthesis, 1203
protein, in [^{3}H]phosphatidylethanolamine exchange, 355

D

Daucus carota (see carrot)
Daughter colony separation, *Lemna*, 913
Deoxyribonucleic acid
-DNA hybridization, homology measurement by, 234
endomitotic, synthesis by gibberellic acid, 13
mitochondrial, isolation in *Oenothera berteriana*, 1207
peanut, reassociation kinetics and cytophotometry, 1121
synthesis, polyamine-induced, 368
synthesis rate, measurement with [^{3}H]TdR, 1194
Dicarboxylate shuttle, nitrate reduction by, 433
2,4-Dichlorophenoxyacetic acid, metabolism in soybean, 94
Dicotyledon
crown gall tumor formation, 184
N,N-dimethylformamide in chlorophyll determination, 478
Dipalmitoyl lecithin, steryl glycoside effect on phase transition of, 78
Diphenyl
ether herbicide, photosynthetic electron transport inhibitor, 47
Disease resistance
Poa pratensis, to *Drechslera sorokiniana*, 569
Divalent cations
electron donation and, spinach, 697
Dogwood, freeze-dehydration injury, 499
Drechslera sorokiniana, resistance or susceptibility in *Poa pratensis*, 569
Dunaliella salina, salt-induced metabolic changes, 810

E

Echinochloa crusgalli, chlorophyll synthesis and cytochrome oxidase activity, 451
Electron donors, photosystem I, spinach, 697
Electron flow, inhibition by diphenyl ether herbicides, 47
Electron transport
ATP/NADPH coupling ratio in chain, 810
coupling of phosphorylation to, 880
photosynthetic, effect of linolenic acid, 707
Endomitosis in pea seeds, by gibberellic acid, 13
Endoplasmic reticulum in storage parenchyma cells, mung bean, 600
Enzyme
acetylcholine-hydrolyzing, biochemical characterization, 447
activity
developmental effects of herbicide on, 238
in xylem of perennials, 377
carbohydrate-degrading, in ripening pear, 1014
conversion of sucrose to pyruvate, 314
coumarin biosynthetic pathway, 171
glyoxysomal, translation and characterization, in cucumber germination, 40
localization for sucrose synthesis, 1017
photosynthetic carbon assimilation, 198
role in cyanide metabolism, 1199
Enzyme (*see also* specific enzyme)
Ester
myo-inositol of indole-3-acetic acid, in *Zea mays*, 422
utilization in germinating seedling, 415
Ethylene
action during petal senescence, *Tradescantia*, 1067
pigweed seed germination, 1149
synthesis, diageotropica mutant of tomato, 327
Eucaryotes, response to sensory input, oat, 658
Euglena gracilis
chloroplast development, 382
effect of light on glucose consumption, 631
metabolic products of heterotrophic CO_2 fixation, 566

F

Fe (see iron)
Fern, measurement of photosynthetic rate of sporophytes and gametophytes, 584

Ferricyanide, induction of flowering in *Lemna gibba* G3, 1058
Flowering, induction in *Lemna gibba* G3, 1058
Fluorescence
Porphyridium cruentum, 714
quenching in photosynthesis, 751
Fluxes, calcium, measurement of, oat, 658
Foliage, nitrogen loss, CO_2 uptake, and transpiration, 403
Formamide hydrolyase in cyanide metabolism, 1199
Fractionation, gibberellin, 218
Freeze concentration, solute protection, 298
Frost, potato, 1146
Fucosyl, transferase activity, cold enhanced, 563

G

α-Galactosidase, clot-dissolving activity in, legume, 618
Gametophyte, photosynthetic rate, fern, 584
Gas chromatography-mass spectrometry, spinach shoot analysis, 623
Gene, expression and subunit association, wheat alcohol, 518
Gibberellic acid
chloroplast development and, 1031
effect on cell division and elongation, 186
endomitotic DNA synthesis and cell elongation, pea epicotyls, 13
suspension culture incubation in, 472
treatment and short day induction, photosynthesis in, 65
Gibberellin
fractionation, 218
spinach shoot, 623
β-D-Glucan hydrolase, activity in zea coleoptile, 768
1,3-β-D-glucanase activity in *Pisum sativum*, 222
[^{14}C]Glucosamine incorporation into glycoproteins, pea, 924
D-[^{14}C]Glucosamine, biosynthesis of glycoproteins, pea, 648
Glucose
incorporation, effect of boron, 266
utilization effect of light, *Euglena*, 631
Glutamate, ATP regenerating system, 956
Glutathione level in dry and hydrated wheat embryo, 1062
Glyceraldehyde-3-phosphate, dehydrogenase activity, maize, 897
Glycine
oxidation in mitochondria, spinach, 389
uptake, membrane potential changes, *Lemna* cells, 1004
Glycine max, valinomycin and gramicidin D effect on reflection coefficient of, 74
Glycine max L. Merr. nitrogenase-catalyzed reduction of N_2 in, 51
Glycine max (see also soybean)
Glycoprotein biosynthesis, effect of antibiotic, 460
Glycosylation, pea cotyledon, 648
Glyoxylate reductase, NADPH linked, in perennials, 377
Glyoxylate synthesis in soybean mesophyll cells, 888
Glyoxysome, enzyme activity during greening, sunflower, 1081
Glyphosphate, effects on phenylalanine ammonia-lyase, 17
Grain legumes, nitrogen nutrition and transport, 961
Gramicidin D, effect on reflection coefficient of soybean root systems, 74
Growth
conditions, for biochemical study of *Lemna paucicostata*, Hegelm, 6746, 906
reduction, metal toxicity effect on, 578

H

$H^{14}CO_3^-$
assimilation in *Chara corallina*, 274
HCO_3^- transport, in alga, 397
Helianthus annus hypocotyls, function of circumnutation, 533
Helminthosporium maydis
race T Toxin, sensitivity loss in corn, 1173
toxin, comparison with acetate derivative, 785
Hemagglutinin, clot dissolving, 618
Herbicide
atrazine toxicity in lambsquarters, 984
diphenyl ether, photosynthetic electron transport inhibition, 47
effect on enzyme activity in barley, 238
inhibition of photosynthetic electron transport, 319
Herbicide (*see* specific product)
HOE 29152 (methyl-2[4-(4-trifluoromethoxy)phenoxy]propanoate), effect on photosynthetic electron transport, 47
Homoserine dehydrogenase, sensitivity alteration in *Zea mays*, 176
Hydration, wheat embryo, 1062
Hydrilla verticillata, acid metabolism and CO_2 fixation, 331
Hydrocarbon, biogenic emission rate, 797
Hydrogen oxidation oxyleghemoglobin-mediated, *Rhizobium japonicum*, 605
Hypergravity in circumnutation, 533

I

Illumination, effect on enzyme activity in maize, 198
Imbibition, rate at temperature variations, soybean, 1096
Indole, metabolic turnover, in *Zea mays* L., 415
Indole-3-acetic acid
esterified and free, in *Zea mays*, 422
interaction with gibberellic acid, 186
Indolacetic acid oxidase activity during chilling, cucumber, 407
Indoleacetaldehyde reductase, role in auxin biosynthesis, 107
Indoleacetylamino acid, auxin activity, 761
Invertase activity in *Aveno sativa*, 136
Iojap mutant of maize, 1108
Ion
absorption, in plants, 160
balance in xylem exudate, wheat, 610
release, abscisic acid promotion of, 537
transport rate, effect of anoxia, red beet, 973
uptake inhibition by 2,3,5-triiodobenzoic acid, 1220
Iron
chlorosis (xylary fluid pH and reduction potential, silver maple, 387
stress, control and study of photochemical capacity, 114, 121
Isocitrate lyase
detection in wheat germ system, by monospecific antibodies, 40
synthesis in sunflower cotyledons, 1081
Isozyme
alcohol dehydrogenase, genetic study, 518
kinetic mechanisms, 1188

K

K^+-ATPase
partial purification, corn root, 931
Kaurene (*ent*-) biosynthesis, and chloroplast development, 1031
Kinetics, reassociation, peanut, 1121

L

Lambsquarters, atrazine toxicity, 984
Leaf
abscisic acid, role in stomatal closure, 1111
rolling, response to water stress, 428
Lectin, role in nitrogen fixation, 1049
Legume
α-galactosidases, hemagglutinin properties in, 618
root nodules, inhibition of fixation activity, 502
water diffusion into seeds, 1229
Legume (*see* specific type)
Lemna gibba
G1, membrane potential changes, 1004
G3, flowering, 1058
light effect on protein synthesis, 641
Lemna paucicostata Hegelm, 6746
life cycle and colony types, 913
standardized conditions for biochemical studies, 906
Lentil lectin, binding to *Rhizobium*, 1049
Leucine, transport activity, in scutellum, 249
Light
effect on
dark-grown *Euglena* cells, 631
enzyme activity in herbicide-treated barley, 238
protein synthesis, 641
Light-induced changes in allophycocyanin, 6
Linoleate desaturation, effect of light treatment, maize, 1027
Linolenic acid, effect on photosynthetic electron transport, 707
Lipid composition and metabolism, in alga, 260
Lipopolysaccharide, hypersensitive response in tobacco, correlation, 557
Lolium perenne L. (*see* ryegrass)
Luminescence, adenosine triphosphatase activity and, *Chlorella*, 691

M

Magnesium, effect on intact chloroplasts, 350
Maize
characterization of photorespiration, 254
green leaf, carbon dioxide fixation, 802
seedlings, fatty acid desaturation, 1027
zein mRNA heterogeneity, 98
Maize (*see also Zea mays*)
Malate
decarboxylation, role in crassulacean acid metabolism, *Kalanchoe*, 675
inhibition, day/night cycle, 792
Malate dehydrogenase, detection in wheat germ system, by monospecific antibodies, 40
Malate synthase, detection in wheat germ system, by monospecific antibodies, 40
[^{14}C]Mannose incorporation into glycoproteins, pea, 924
D-[^{14}C]Mannose, glycoprotein biosynthesis in pea, 648
Marine halophyte, salinity and cell membrane potential, 544
Melilotus alba, coumarin biosynthesis in, 171
Membrane
depolarization, *Lemna*, 1004

permeability during petal senescence, *Tradescantia*, 1067
Meristemoid, ADP and NAD^+ in formation, 587
Mesophyll, *Zinnia elegans*, for study of tracheary element differentiation, 57
Metabolism
cysteine, in tobacco cells, 151
phenolic compounds, glyphosate effects on, 17
Metabolite
distribution during photosynthesis, wheat, 902
interconversion, NAD^+-malic enzyme, 1136
Metal, toxicity, inhibition of growth, 578
Mg chelatase, ATP requirement for, 956
Mitochondria
ATPase activity, pea cotyledon, 281
development, during seed imbibition, 229
Kalanchoë daigremontiana, malate decarboxylation by, 675
oxidation of glycine, 389
toxin effect on susceptible and on resistant plants, 785
Monoterpene emission rate, influence of light and temperature, 797
Mung bean, endoplasmic reticulum accumulation, 600
Mutant, diageotropica, stress-induced ethylene production, 327

N

N^6-(Δ^2-isopentenyl)adenosine degradation, tobacco cell, 1090
NADH
nitrate reductase activity, soybean, 595
oxidation, potato, 591
NADP, photoreduction, inhibition in spinach, 495
NADP-glyceraldehyde-3-phosphate dehydrogenase synthesis, inhibition, *Euglena* 382
NADPH
nitrate reductase activity, soybean, 595
oxidation by plant mitochondria, potato, 591
NH_4^+
heterotrophic CO_2 fixation in *Euglena*, 566
NH_4CL
effect on carbon dioxide fixation rate, 526
Nicotiana,
ribulose-1,5-biphosphate carboxylase-oxygenase isolation from, 69
Nicotinamide adenine dinucleotide (NAD)-malic enzyme, measurement, 1136
Nitella axillaris
cell wall expansion process in, 211
control of cell elongation in, 204
effects on nitrogen fixation, 502
reduction with substrates, 433
uptake, in *Ricinus communis*, 286
Nitrate reductase
assay, pool size measurement in wheat (*Triticum aestinum* L.), 27
protein action, 146
protein inactivation, 141
synthesis in ammonia-grown cells, 944
synthesis in *Chlorella*, 939, 944
utilizing NAD(P)H, soybean, 595
Nitrofluorfen(2-chloro-1-[4-nitrophenoxy]-4-[trifluoromethyl]benzene), effect on photosynthetic electron transport, 47
Nitrogen
fixation
effect of nitrate on, 502
nodulation and, in cliffrose, 411
loss determination in plant foliage, 403
nutrient influence on photosynthesis, 541
storage and transport in plants, 22
Nodule
root, and nitrogen fixation, cliffrose, 411
soybean, effect of light and temperature, 51
Nostoc sp., chlorophyll-protein complexes, 392
Nucleic isolation, wheat, 305, 309
Nucleotide pool, during shoot initiation, 587

O

Oat
coleoptiles, amino acid uptake mechanisms, 1085
leaf metabolism, during senescence, 855
protease activity during greening, 663
seedlings, invertase activity, 136
Ochromonas malhamensis, cAMP synthesis by, 165
Octopine synthase purification and characterization, 949
Oenothera berteriana, mitochondrial DNA isolation, 1207
Oilseed, lipid hydrolysis, 1176
Oleate desaturation, effect of light treatment, maize, 1027
β-Oligoglucosides, synthesizing, 554
Organelle membranes, transverse distribution of phospholipids in, *Ricinus communis*, 1076
Orthophosphate transport, and rate of CO_2 fixation, 574
Osmotic pressure measurement, corn, 614
Oxaloacetate reduction, influence of exogenous salts, 703
Oxidation, mitochondrial, comparison of *Helminthosporium maydis* toxin and acetate derivative, 785
Oxygen
effect on pool size in photosynthesis and photorespiration, 442
evolution, inactivation in chloroplasts, 735
inhibition of photosynthesis, *chlorella pyrenoidosa*, 780
light-driven uptake by *Scenedesmus*, 723
response, reduction in *Panicum*, 346
stress in seminal root system, 506
uptake during imbibition, bean, 669
Oxygenase
activity
Nicotiana, 69
ribulose 1,5-biphosphate, 465
Oxyleghemoglobin, hydrogen oxidation, soybean, 605

P

Panicum, enzyme activities, oxygen response, photosynthesis, 156
Panicum milioides, reduced photorespiration, 346
Parenchyma, RNA synthesis, pea root, 838
Pea
ATPase activity in submitochondrial particles, 281
endomitotic DNA synthesis and cell elongation in seed, 13
epicotyls grown from gamma-irradiated, 13
RNA synthesis in parenchyma, 838
Peanut
DNA, reassociation kinetics, 1121
leaf conductance, anomaly, 848
Pear
cell wall metabolism, 1009, 1014
fruit, effect of aminoethoxyvinylglycine on ripening, 372
Permeability in damaged dogwood cells, 499
Peroxidase activity during chilling, cucumber, 407
Peroxidation, lipid, and aging, in soybean axes, 245
Peroxide level during chilling, cucumber, 407
Petiole
cotton, reduced auxin transport capacity, 1023
girdling, in stomatal closure and photosynthetic inhibition, soybean leaves, 884
Phaseic acid, effect on stomatal closure, 291
Phaseolus coccineus L., electrical membrane properties and circadian rhythm, 966
Phaseolus vulgaris L. seed storage protein, 627
Phaseolus vulgaris (*see* bean)
Phenolic compound metabolism, glyphosate effects on, 17
Phenylalanine ammonia-lyase, glyphosate effects, soybean seedlings, 17
Phloem transport,
cotton leaves, 844
sieve tube turgor, 1133
[^{3}H]phosphatidylethanolamine exchange, cytosol stimulation, 355
Phosphoenolpyruvate carboxylase light cycle sensitivity to malate, 792
Phospholipid distribution in membranes, *Ricinus communis*, 1076
Phosphorus, nutrient effects on photosynthesis, 541
Phosphorylation, coupling to electron transport, 880
Photochemical oxidant, vegetation, 797
Photoinhibition, effect of light intensity exposure, bean, 1181
Photophosphorylation
analysis in bundle sheath cells, maize, 685
cyclic, of thylakoids, 298
Photorespiration
characterization, using carbon dioxide labeling, 254
CO_2 and O_2 effects on carbon pool size, 442
microscopic algae, 980
Photosynthate movement from mesophyll cells to phloem, 560
Photosynthesis
C_4, pyrophosphatase activity, 860
carbon assimilation, 774
CO_2 and O_2 effects on carbon pool size, 442
effect on soybean root nodule, 51
function of short day induction and gibberellic acid treatment, in *Bougainvillea*, 65
grass species, 156
HCO_3^- as direct C source, 397
inhibition, *Chlorella pyrenoidosa*, 780
inhibition with herbicides, 319
leaf, influence of nutrient, 541
limiting factors, 114, 121
metabolite distribution during induction phase, 902
quenching of fluorescence yield, 751
solvent residue effect on, 291
source/sink relations, 884
sporophyte and gametophyte of fern, 584
Vallisneria, cell membrane potential, 1
Warburg effect and, 755
Photosystem I
electron donation, spinach, 697

linolenic acid effect on photosynthetic electron transport, 707
particles, isolation with Triton X-100, 814
peripheral chlorophyll proteins, study, 823
Photosystem II
carbon dioxide requirement, 1160
inactivation by Tris, 735
linolenic acid effect on photosynthetic electron transport, 707
Phytochrome inducing photoreversible calcium flux, oat, 658
Phytotoxins, synthetic, 554
Pigment, complement of dark grown algae, 469
Pinus contorta, temperature influence on water uptake, 635
Pisum sativum
asparaginase isolation, 22
1,3-β-D-glucanase activity, 222
Pisum sativum L. protein synthesis, 924
Pisum sativum (*see* pea)
Plant extract purification using prepacked cartridge, 523
Plasma membrane labeling and isolation, 1053
Plasmalemma
influx of potassium chloride, red beet, 969
transport, sulfhydryl involvement, 274
Plastid protease activity during greening, oat, 663
Ploidy effects on ryegrass synthesis, 489
Poa pratensis, light quality and disease resistance to *Drechslera sorokiniana*, 569
Pod removal, effect on stomatal closure and photosynthetic inhibition, soybean leaves, 884
Polyamine, effect on incorporation of thymidine, 368
Polysaccharide
cell wall, in fruit ripening, 1009
slime secretion, effect of cold, 563
Polysome, cellular distribution of endosperm, castor bean, 359
Porphyridium cruentum, light influence on photochemical apparatus, 714
Portulaca oleracea L., crassulacean acid metabolism, 193
Potassium
accumulation, effect of temperature and light, *V. faba*, 1036
influx, effect of ATPase inhibitors, 1139
nutrient effects on photosynthesis, 541
uptake, barley, 160
Potato
frost hardiness, 1146
mitochondria, NADPH oxidation, 591
Pressure-volume, measurement of osmotic pressure, 614
Procaryotes, response to sensory input, oat, 658
Prolamellar bodies, enzyme activity during greening, oat, 663
Propyl gallate inhibition of alternative respiratory pathway, bean, 669
Protein
accumulation, variation, in *Phaseolus vulgaris* L., 627
corn and rice inactivating, 146
glycosylation in castor bean endosperm, 1073
kinase, light activation, 730
nitrate reductase-inactivating, 141
precursor, synthesis of nitrate reductase, 939
7S storage, synthesis of α and α′ subunits, 990
synthesis
preformed mRNA, 1128
wheat embryo, glutathione level, 1062
Protochlorophyll accumulation, absence in algae, 469
Proton gradient, in charge recombination process, *Chlorella*, 691
Protoplast
fusion, temperature effect on, 1099
isolation, 1053
oat leaf, DNA synthesis, 368
plasma membrane isolation, corn, 1053
sugar transport, 550
Pseudomonas solanacearum, hypersensitive response in tobacco, 557
Pulse-chase, experiment in green maize leaf, 802
Pyrimidine pathway, in boron-deficient cotton fiber, 893
Pyrophosphatase, calcium inhibition, 860
Pyrus communis (*see* pear)
Pyruvate dehydrogenase complex, from castor bean endosperm, 314
Pyruvate kinase isolation from castor bean endosperm, 1188

R

Radiation, ultraviolet-*B*, effect on soybean, 483
Receptors, cellular, cytoplasmic Ca level change, oat, 658
Respiration
alternative pathway, bean, 669
wound stimulated, *Bryophyllum tubiflorum* Harv., 409
Respiratory electron transport chain, inoperative, 433
Rhizobium, lentil lectin binding to, 1049
Rhizobium japonicum, hydrogen oxidation system, *R. japonicum*, 605
Rhodanese in cyanide metabolism, 1199
Rhynchosporoside, methylation analysis, 554
Ribulose-1,5-biphosphate carboxylase
light effect on synthesis of, 641
loss during senescence, barley leaf, 1103
Ribulose 1,5-biphosphate carboxylase/oxygenase
activity, kinetic analysis, 465
crystallization, in tobacco mutant, 828
functional significance, in *Nicotiana*, 69
Rice
cell cultures, nitrate reductase inactivating proteins from, 141
leaf senescence, 340
starch breakdown in germinating seeds, 81
Ricinus communis
nitrate uptake, 286
phospholipids in organelle membranes, 1076
polysome distribution, 359
Ripening, pear fruit, effect of aminoethoxyvinylglycine, 372
RNA
chloroplast, extraction and measurement, 746
synthesis
characterization, 305, 309
kinetin-treated pea root, 838
wheat and soybean embryo, 1155
mRNA
for α-amylase, 834
isolation, in zein synthesis, 98
preformed, in *Cicer arietinum* L., 1128
Root, influence of soil temperature, 635
Rosa sp., effect of gibberellic acid on growth, 472
Rough endoplasmic reticulum, radioactivity, pea, 648
^{86}Rubidium ions, uptake and translocation, corn, 506
Ryegrass, photosynthetic carbon metabolism, 489

S

Saccharide glycoconjugate, in organelles, castor bean, 1073
Salicornia bigelovii Torr. (*see* marine halophyte)
Salicylic acid, induction of flowering in *Lemna gibba* G3, 1058
Salinity, effect on cell membrane potential, marine halophyte, 544
Salt
exogenous, inhibitory and stimulatory effects, 703
metabolic changes induced in *Dunaliela salina*, 810
Sandoz, 6706, effect on enzyme activity in barley, 238
Sap, phloem and xylem, ion monement in, 286
Scenedesmus obliquus, light-driven uptake of oxygen, carbon dioxide, and bicarbonate, 723
Scutellum, uptake activity, in barley, 249
Seagrass, determining $\delta^{13}C$ value, 512
Sedum praealtum, photosynthesis in isolated chloroplasts, 1044
Seed
accelerated aging, soybean, 245
coat, ^{14}C-pulse, soybean, 975
respiration, alternative pathway, 669
Senescence
membrane permeability during, *Tradescantia*, 1067
monocarpic, in rice, 340
protein loss during, barley leaf, 1103
Sequence homology, presence in DNA, 234
Shoot formation in tobacco callus, 587
Sieve tube, turgor pressure measurement, 1133
Silver toxicity in plants, 336
Sink leaf, photosynthesis, 1116
Solanum tuberosum L., CO_2 enrichment of root zone, 1216
Sorghum bicolor (L.) Moench RS671 water flow resistance in, 33
Source leaf, photosynthesis in, 1116
Soybean
allantoic acid synthesis, 1203
axes, lipid peroxidation and aging, 245
^{14}C-photosynthate uptake, 975
2,4-dichlorophenoxyacetic acid metabolism, 94
imbibition and leakage, temperature effects, 1096
mesophyll cells, glyoxylate synthesis, 888
nitrate reductase activity, 595
nitrogen loss, CO_2 uptake and transpiration, 403
phenylalanine ammonialyase in, 17
plasma membrane, sterol content, 871
RNA synthesis in embryo, 1155
storage protein synthesis, 990
ultraviolet-B radiation, 483
Soybean (*see also Glycine max*)
Spherosomes, membrane components, formation and degradation, castor bean, 1176

Spinach
13-C-hydroxylated gibberellins, 623
chloroplast
acyl-CoA thioesterase activity, 1039
glycine-oxidizing capacity, 389
inhibition of NADP photoreduction, 495
metabolite accumulation and transplant in, 574
protein kinase activity, 730
Warburg effect, 755
effect of exogenous salt on electron transport, 703
Spinacia oleracea, effect of gibberellic acid on growth, 472
Spinacia oleracea (*see* spinach)
Sporophyte, photosynthetic rate, fern, 584
Starch
accumulation in chloroplasts, 844
breakdown during seed germination, 81
Sterol content, soybean plasma membrane, 871
Steryl glycoside, effect on phase transition of dipalmitoyl lecithin, 78
Stomata
adjustment to water stress, cotton, 455
closure
effect of phaseic acid, 291
effect on photosynthesis rate, 1111
soybean leaves, 884
potassium chloride effect in *Allium cepa* L., 88
resistance to water stress, 428
temperature and light effect on opening, 1036
Streptoverudin, effect on glycoprotein biosynthesis in mung bean and soybean, 460
Su/su; ribulose-1,5-biphosphate carboxylase/oxygenase and polyphenol oxidase in, 828
Substrates, endogenous, development and distribution, 222
Succinate dehydrogenase, solubilized from mitochondria, 229
Sucrose
carbon source for fatty acid synthesis, 314
synthesis in C_3 and C_4 plants, 1017
Sucrose (*see also* sugar)
Sugar
efflux from protoplasts, 560
transplant system in protoplasts, 550
Sugarcane cells, degradation of ^{14}C and ^{3}H-labeled thymidine, 1224
Sunflower
cotyledons, synthesis of isocitrate lyase in, 1081
effect of abscisic acid on exudation process, 537

T

Tebuthiuron, photosynthesis inhibition, 319
Temperature
effect on
germination response to ethylene, 1149
protoplast fusion, 1099
soybean imbibition and leakage, 1096
stomatal aperture and potassium accumulation, *V. faba*, 1036
water uptake, 635
Temperature (*see also* chilling, cold, frost)
1,3,4-Thiadiazolyl derivatives, inhibition of electron transport, 319
Thylakoid
cryoprotection, 298
membrane, association with chloroplast RNA, 746
Thymidine
^{14}C and ^{3}H-labeled, degradation by sugarcane cells, 1224
metabolism in carrot, 1194
Tobacco
callus, ADP and NAD^+ during shoot formation, 587
cell,
biological effects of cytokinin, 363
cytokinin degradation, 1090
cysteine metabolism in cells, 151
exogenous cytokinin and cell division, 437
hypersensitive response induced by *Pseudomonas solanacearum*, 557
mutant, *Su/su*, enzyme activity, 828
urease level change in cells, 995
Todea barbara (*see* fern)
Tomato
diageotropica mutant, 327
silver toxicity, 336
waterlogging, 322
Tonoplast, membrane transport system for sugar, pea, 550
Toxicity, cadmium, in bean plants, 480
Toxin
Helminthosporium maydis and acetate derivative, comparison, 785
sensitivity loss, corn, 1173
Tracheary element
cytodifferentiation, in single cells of *Zinnia elegans*, 61
differentiation, study of, in *Zinnia elegans*, 57
Tradescantia, petal senescence, 1067
Translocation
obstructed, effects, 1111
vascular tissue region, 560
2,3,5-Triiodobenzoic acid inhibition of K and Cl uptake, barley, 1220
Tris inactivation of oxygen evolution, 735
Triticum aestinum L. nitrate pool size, measurement in, 27
Triton X-100, isolation of photosystem I, 814
Tumor, crown gall, catalytic activity of octopine synthase, 949
Tumor (*see also* specific tumor)
Tunicamycin, effect on glycoprotein biosynthesis, mung bean and soybean, 460
Turgor pressure measurement in sieve tube, 1133

U

Ultraviolet-B irradiation, effect on soybean, 483
Urea, as nitrogen source, tobacco, 995
Urease activity, response to urea, tobacco, 995
Ureide formation, and N_2 fixation, 961

V

Vacuole isolation, cytoplasmic contamination in, 85
Valinomycin, effect on reflection coefficient of soybean root systems, 74
Vallisneria, leaf cells, membrane potential, 1
Vein, loading, effect of metal toxicity on, 578
Volvox carteri, lipid composition and metabolism, 260

W

Warburg effect, in spinach chloroplasts, 755
Water
aerodynamic resistance to efficient use, 132
deficit, in auxin transport, 1023
diffusion into seeds, 1229
flow, resistance in sorghum plant, 33
permeability, in freeze-dehydration injury, 499
stress,
stomatal resistance, 428
stomatal response, in cotton, 455
Weed control, ethylene, 1149
Wheat
alcohol, dehydrogenase isozyme assay, 518
influence of cell age on chlorophyll, 680
RNA synthesis in embryo, 1155

X

Xanthine dehydrogenase in cytosol, 1203
Xylem
abscisic acid and ion release, sunflower, 537
extract, glyoxylate reductase in, 377
Fe chlorosis stress, silver maple, 387
organic acid and ionic balance, wheat, 610
transplant of
1-aminocyclopropane-1-carboxylic acid, 322
nitrogen in ureide-producing legumes, 961

Z

Zea, coleoptile, β-D-glucan hydrolase activity, 768
Zea mays
effect of illumination on enzyme activity, 198
homoserine dehydrogenase, changes during growth period, 176
indole-3-acetic acid as low molecular weight derivatives, 422
Zea mays L.
assimilate transfer, 864
glyceraldehyde-3-phosphate dehydrogenase activity, 897
iojap mutant of, 1108
metabolic turnover of indoles, 415
Zein mRNA, localization in maize, 98
Zinnia elegans,
tracheary element
differentiation, 57
formation in, without mitosis, 61

Volume Contents

Number 1. July

1 **Protoplasts as a Means of Studying Chloroplast Development *in Vitro***—Luigi F. De Filippis, Rüdiger Hampp, and Hubert Ziegler

8 **Metabolism of Specifically Labeled Glucose, Glucose 1-Phosphate, and Glucose 6-Phosphate via the Oxidative Pentose Phosphate Cycle in a Reconstituted Spinach Chloroplast System in Darkness and in Light**—Klaus J. Lendzian

13 **Carbon Dioxide and Flowering in *Pharbitis nil* Choisy**—Peter R. Hicklenton and Peter A. Jolliffe

18 **Characterization of Three Photosystem II Mutants in *Zea mays* L. Lacking a 32,000 Dalton Lamellar Polypeptide**—Kenneth J. Leto and Donald Miles

25 **Isolation of Protoplasts and Vacuoles from Storage Tissue of Red Beet**—Rainer Schmidt and Ronald J. Poole

29 **Kinetics of ^{14}C Distribution during Photosynthesis by Chloroplast Preparations Isolated from the Siphonous Alga *Caulerpa simpliciuscula***—Bruce R. Grant and Russell John Howard

34 **Activation of Glyceraldehyde-Phosphate Dehydrogenase (NADP) and Phosphoribulokinase in *Phaseolus vulgaris* Leaf Extracts Involves the Dissociation of Oligomers**—Onnop Wara-Aswapati, Roger J. Kemble, and J. William Bradbeer

40 **Units of Freezing of Deep Supercooled Water in Woody Xylem**—Sung-Gak Hong and Edward Sucoff

46 **Plasmalemma Transport of OH^- in *Chara corallina*. III. Further Studies on Transport Substrate and Directionality**—William J. Lucas and Jack M. Ferrier

51 **Isotopic Fractionation Associated with Symbiotic N_2 Fixation and Uptake of NO_3^- by Plants**—Daniel H. Kohl and Georgia Shearer

57 **Distribution of ^{15}N among Plant Parts of Nodulating and Nonnodulating Isolines of Soybeans**—Georgia Shearer, Daniel H. Kohl, and James E. Harper

61 **Estimates of N_2 Fixation Based on Differences in the Natural Abundance of ^{15}N in Nodulating and Nonnodulating Isolines of Soybeans**—Daniel H. Kohl, Georgia Shearer, and James E. Harper

66 **Long Distance Transport in *Macrocystis integrifolia*. III. Movement of THO**—Klaus Schmitz and Lalit M. Srivastava

70 **Development of Mitochondrial Activities in Pea Cotyledons during and following Germination of the Axis**—Yukio Morohashi and J. Derek Bewley

74 ***In Vivo* Detection of Membrane Injury at Freezing Temperatures**—Darryl G. Stout, Walter Majak, and Martin Reaney

78 **Nitrate and Carbohydrate Effects on Nodulation and Nitrogen Fixation (Acetylene Reduction) Activity of Lentil (*Lens esculenta* Moench)**—Peter P. Wong

82 **Role of the Cotyledons in the Phototropic Response of *Lavatera cretica* Seedlings**—Amnon Schwartz and Dov Koller

88 **Ethylene Production and Leaflet Abscission in *Melia azedarach* L.**—Page W. Morgan and James I. Durham

93 **Purification and Some Properties of Cell Wall-bound Invertases from Sugar Beet Seedlings and Aged Slices of Mature Roots**—Hiroshi Masuda and Shiro Sugawara

97 **Photosynthesis of Grass Species Differing in Carbon Dioxide Fixation Pathways. V. Response of *Panicum maximum*, *Panicum milioides*, and Tall Fescue (*Festuca arundinacea*) to Nitrogen Nutrition**—Jacqueline K. Bolton and R. Harold Brown

101 **Carbon Exchange Rates of Shoots Required to Utilize Available Acetylene Reduction Capacity in Soybean and Alfalfa Root Nodules**—J. E. Sheehy, K. A. Fishbeck, T. M. DeJong, L. E. Williams, and D. A. Phillips

105 **Co-purification of Pea and Bean Leaf Soluble Auxin-binding Proteins with Ribulose-1,5-Bisphosphate Carboxylase**—Alison J. Wardrop and Gideon M. Polya

112 **Ligand Specificity of Bean Leaf Soluble Auxin-binding Protein**—Alison J. Wardrop and Gideon M. Polya

119 **Plant Nucleases. VI. Genetic and Developmental Variability in Ribonuclease Activity in Inbred and Hybrid Corn Endosperms**—Curtis M. Wilson

126 **Estimating Kinetic Parameters when the Amount of Enzyme Added to an Assay Is Not a Controlled Variable. Nitrogenase Activity of Intact Legumes**—Lawrence C. Davis

130 **Purity of Chloroplasts Prepared from the Siphonous Green Alga, *Caulerpa simpliciuscula*, as Determined by Their Ultrastructure and Their Enzymic Content**—Bruce R. Grant and Simon W. Wright

139 **Asparagine Formation in Soybean Nodules**—Shinsuke Fujihara and Masuro Yamaguchi

142 **Chloroplast Biogenesis 31. Detection of an Inhibitor of Protochlorophyll Biosynthesis in Cucumber Cotyledons**—Susan A. McCarthy and Constantin A. Rebeiz

147 **Dynamic Aspects and Enhancement of Leaf Elongation in Rice**—Jay M. Cutler, Peter L. Steponkus, Michael J. Wach, and Kevin W. Shahan

153 **Screening for Barley Mutants with Altered Hormone Sensitivity in Their Aleurone Layers**—Tuan-hua David Ho, Shu-Cheng Shih, and Andris Kleinhofs

158 **Composition of the Capsular and Extracellular Polysaccharides of *Rhizobium japonicum*. Changes with Culture Age and Correlations with Binding of Soybean Seed Lectin to the Bacteria**—Andrew J. Mort and Wolfgang D. Bauer

164 **Grain Protein Accumulation and the Relationship between Leaf Nitrate Reductase and Protease Activities during Grain Development in Maize (*Zea mays* L.). I. Variation between Genotypes**—Andrew J. Reed, Fred E. Below, and Richard H. Hageman

171 **Comparison between Aging of Slices and Ethylene Treatment of Whole White Potato Tubers**—Harry W. Janes and Steven C. Wiest

175 **Induction of Secondary Dormancy in *Chenopodium bonus-henricus* L. Seeds by Osmotic and High Temperature Treatments and Its Prevention by Light and Growth Regulators**—Anwar A. Khan and C. M. Karssen

182 ***In Vitro* Incorporation of Selenomethionine into Protein by *Vigna radiata* Polysomes**—David C. Eustice, Ian Foster, Frederick J. Kull, and Alex Shrift

187 **Enzymic Determination of Metabolites in the Subcellular Compartments of Spinach Protoplasts**—Wolfgang Wirtz, Mark Stitt, and Hans W. Heldt

194 **Density of Microbodies on Sucrose Gradients during Phytochrome-mediated Glyoxysome Peroxisome Transformation in Cotyledons of Mustard Seedlings**—Young-Nam Hong and Peter Schopfer

197 **Corrections**

Number 2. August

199 **Glycosidic Enzyme Activity in Pea Tissue and Pea-*Fusarium solani* Interactions**—Everett J. Nichols, Jean M. Beckman, and Lee A. Hadwiger

205 **Chitosan as a Component of Pea-*Fusarium solani* Interactions**—Lee A. Hadwiger and Jean M. Beckman

212 **Activation of Nitrate Reductase by Extracts from Corn Scutella**—Tomoyuki Yamaya and Ann Oaks

215 **Production of Hexanal and Ethane by *Phaeodactylum* triconutum and Its Correlation to Fatty Acid Oxidation and Bleaching of Photosynthetic Pigments**—Brigitte Schobert and Erich F. Elstner

220 **Studies of the Mechanism of Enhancement of Phytochrome-dependent Lettuce Seed Germination by Prechilling**—William J. VanDerWoude and Vivian K. Toole

225 **Effect of NAD^+ on Malate Oxidation in Intact Plant Mitochondria**—Alyson Tobin, Bahia Djerdjour, Etienne Journet, Michel Neuburger, and Roland Douce

230 **The Mechanism of Abscisic Acid-induced Proline Accumulation in Barley Leaves**—Cecil R. Stewart

234 **Effect of Temperature on Electron Transport Activities of Isolated Chloroplasts**—William G. Nolan

238 **Membrane Phospholipid Phase Separations in Plants Adapted to or Acclimated to Different Thermal Regimes**—Carl S. Pike and Joseph A. Berry

242 **A Proposed Mechanism for the Stimulatory Effect of Bicarbonate Ions on ATP Synthesis in Isolated Chloroplasts**—William S. Cohen and Wendy A. MacPeek

246 **Isolation and Identification of a Senescence-promoting Substance from Wormwood (*Artemisia absinthium* L.)**—Junichi Ueda and Jiro Kato

250 **Diffusion from a Circular Stoma through a Boundary Layer. A Field-theoretical Analysis**—James R. Troyer

254 **Effect of *Eucalyptus* Growth Regulators on the Water Loss from Plant Leaves**—Dugald M. Paton, Ashok K. Dhawan, and Rudolf R. Willing

257 **Inhibition of Steryl Glycoside Biosynthesis by Acyl Coenzyme A and by Digitonin**—Raymond E. Garcia and J. Brian Mudd

261 **Amino Acid Transport in Suspension-cultured Plant Cells. II. Characterization of L-Leucine Uptake**—Merrill S. Blackman and Carl N. McDaniel

267 **Growth Responses and Adaptations of *Fraxinus pennsylvanica* Seedlings to Flooding**—A. R. Sena Gomes and T. T. Kozlowski

272 **Identification of the Low Molecular Weight Copper Protein from Copper-intoxicated Mung Bean Plants**—Charles Nicholson, III, Jill Stein, and Karl A. Wilson

276 **Endorhizal and Exorhizal Acetylene-reducing Activity in a Grass (*Spartina alterniflora* Loisel.)-Diazotroph Association**—C. David Boyle and David G. Patriquin

281 **Biosynthesis of Wound Ethylene**—Yeong-Biau Yu and Shang Fa Yang

286 **Inhibition of Ethylene Production by 2,4-Dinitrophenol and High Temperature**—Yeong-Biau Yu, Douglas O. Adams, and Shang Fa Yang

291 **Preparation of Chloroplasts from *Euglena* Highly Active in Protein Synthesis**—William Ortiz, Ellen M. Reardon, and Carl A. Price

295 **Photomorphogenic Regulation of Chloroplast Replication in *Euglena*. Enhanced Loss of Chloroplast DNA in Red Light**—Usha Srinivas and Harvard Lyman

302 **Oxygen Exchange in Leaves in the Light**—David T. Canvin, Joseph A. Berry, Murray R. Badger, Heinrich Fock, and C. Barry Osmond

308 **Isolation and Characterization of Thiamin Pyrophosphotransferase from *Glycine max* Seedlings**—William T. Molin and Roger C. Fites

313 **Thiamin Phosphorylation by Thiamin Pyrophosphotransferase during Seed Germination**—William T. Molin, Curtis G. Wilkerson, Jr., and Roger C. Fites

316 **Effect of Dehydration on Leakage and Membrane Structure in *Lotus corniculatus* L. Seeds**—Bryan D. McKersie and Robert H. Stinson

321 **An Examination of Centrifugation as a Method of Extracting an Extracellular Solution from Peas, and Its Use for the Study of Indoleacetic Acid-induced Growth**—Maurice E. Terry and Bruce A. Bonner

326 **The Synthesis of Guanosine 5′-Diphosphate L-Fucose from Guanosine 5′-Diphosphate 3,5-D-[^{3}H]Mannose Catalyzed by an Enzyme Extract from Fruits of the Flax**—George A. Barber

330 **A Proposed Role of Zein and Glutelin as N Sinks in Maize**—Charles Y. Tsai, Don M. Huber, and Herman L. Warren

334 **Isolation and Characterization of Glycine Hydroxamate-resistant Cell Lines of *Nicotiana tabacum***—Arthur L. Lawyer, Mary B. Berlyn, and Israel Zelitch

342 **Betaine Synthesis from Radioactive Precursors in Attached, Water-stressed Barley Leaves**—Andrew D. Hanson and Nancy A. Scott

349 **Spin-label Studies of Membranes in Rye Protoplasts during Extracellular Freezing**—Jas Singh and Richard W. Miller.

Number 3. September

353 **Partial Characterization of Fusicoccin Binding to Receptor Sites on Oat Root Membranes**—Richard G. Stout and Robert E. Cleland

360 **Histone Kinase from Soybean Hypocotyls. Purification, Properties, and Substrate Specificities**—Paul P.-C. Lin and Joe L. Key

368 **Phosphoprotein Phosphatase of Soybean Hypocotyls. Purification, Properties, and Substrate Specificities**—Paul P.-C. Lin, Tokunori Mori, and Joe L. Key

375 **Legume. α-Galactosidase Forms Devoid of Hemagglutinin Activity**—Charles N. Hankins, Juanita I. Kindinger, and Leland M. Shannon

379 **The Rapid Isolation of Vacuoles from Leaves of Crassulacean Acid Metabolism Plants**—Randi Kringstad, William H. Kenyon, and Clanton C. Black, Jr.

383 **Steady-state Growth of the Marine Diatom *Thalassiosira pseudonana*. Uncoupled Kinetics of Nitrate Uptake and Nitrite Production**—Robert J. Olson, Janice Beeler SooHoo, and Dale A. Kiefer

390 **The Endoplasmic Reticulum of Mung Bean Cotyledons. Role in the Accumulation of Hydrolases in Protein Bodies during Seedling Growth**—Willem Van der Wilden, Neil R. Gilkes, and Maarten J. Chrispeels

395 **The Influence of Aliphatic Alcohols on Leaf Senescence**—Sergio O. Satler and Kenneth V. Thimann

400 **Isolation of Cytoplasmic Enzymes from Pollen**—Norman F. Weeden and Leslie D. Gottlieb

404 **Partial Purification of an Ethylene-binding Component from Plant Tissue**—Edward C. Sisler

407 **Internal Inorganic Carbon Pool of *Chlamydomonas rein-***

hardtii. **Evidence for a Carbon Dioxide-concentrating Mechanism**—Murray R. Badger, Aaron Kaplan, and Joseph A. Berry

414 **Biochemical Changes in Tuber-bearing *Solanum* Species in Relation to Frost Hardiness during Cold Acclimation**—Hwei-Hwang Chen and Paul H. Li

422 **Uptake and Subcellular Compartmentation of Gibberellin A_1 Applied to Leaves of Barley and Cowpea**—John B. Ohlrogge, Jose L. García-Martínez, David Adams, and Lawrence Rappaport

428 **Fractionation of Thylakoid Membranes with the Nonionic Detergent Octyl-β-D-Glucopyranoside. Resolution of Chlorophyll-protein Complex II into Two Chlorophyll-protein Complexes**—Edith L. Camm and Beverley R. Green

433 **Evidence that Auxin-induced Growth of Soybean Hypocotyls Involves Proton Excretion**—David L. Rayle and Robert E. Cleland

438 **Partial Characterization of a Cadmium-binding Protein from the Roots of Cadmium-treated Tomato**—Michael Bartolf, Eileen Brennan, and Carl A. Price

442 **Method to Obtain a Chlorophyll-free Preparation of Intact Mitochondria from Spinach Leaves**—Anders Bergman, Per Gardeström, and Ingemar Ericson

446 **Photophosphorylation Capacity of Stable Spheroplast Preparations of *Anabaena***—Hart Spiller

451 **Inhibition of Potato Tuber Invertase by an Endogenous Inhibitor. Effects of Salts, pH, Temperature, and Sugars on Binding**—Roger S. Anderson, Elmer E. Ewing, and Ann Hedges Senesac

457 **Malate Oxidation in Plant Mitochondria via Malic Enzyme and the Cyanide-insensitive Electron Transport Pathway**—Pierre Rustin, François Moreau, and Claude Lance

463 **Quantum Requirement for Photosynthesis in *Sedum praealtum* during Two Phases of Crassulacean Acid Metabolism**—Martin H. Spalding, Gerald E. Edwards, and Maurice S. B. Ku

466 **Effect of Temperature on the Synthesis and Secretion of α-Amylase in Barley Aleurone Layers**—Ahmed Fadeel, Benjamin A. Moll, and Russell L. Jones

471 **Carbohydrates in Soybean Nodules. II. Distribution of Compounds in Seedlings during the Onset of Nitrogen Fixation**—John G. Streeter

477 **Effects of Purified *Helminthosporium maydis* Race T Toxin on the Structure and Function of Corn Mitochondria and Protoplasts**—Peter Gregory, Elizabeth D. Earle, and Vernon E. Gracen

482 **Responses of Superoxide Dismutase and Glutathione Reductase Activities in Cotton Leaf Tissue Exposed to an Atmosphere Enriched in Oxygen**—Joyce G. Foster and John L. Hess

488 **Cyanide-insensitive and Cyanide-sensitive O_2 Uptake in Wheat. I. Gradient-purified Mitochondria**—Alan H. Goldstein, James O. Anderson, and Robert G. McDaniel

494 **X-ray Analysis Studies of Elements Stored in Protein Body Globoid Crystals of *Triticum* Grains**—John N. A. Lott and Ernest Spitzer

500 **Phytochrome Modification and Light-enhanced, *in Vivo*-induced Phytochrome Pelletability**—Maury L. Boeshore and Lee H. Pratt

505 **Evidence for Light-stimulated Synthesis of Phosphoenolpyruvate Carboxylase in Leaves of Maize**—Donald R. Hague and Thomas L. Sims

510 **Pulse-labeling Studies on Protein Synthesis in Developing Pea Seeds and Evidence of a Precursor Form of Legumin Small Subunit**—Donald Spencer, Thomas J. V. Higgins, Susan C. Button, and Ross A. Davey

516 **Soluble Sugars, Respiration, and Energy Charge during Aging of Excised Maize Root Tips**—Pierre H. Saglio and Alain Pradet

520 **Changes in Wheat Leaf Polysomal Messenger RNA Populations during the Early Stages of Rust Infection. Effects of Chloramphenicol and Lincomycin on Cell-free Translation by Polysomes from Healthy and Infected Leaves**—Glenn A. Pure, Arun K. Chakravorty, and K. J. Scott

525 ***Phycomyces*. Modification of Light-induced Spiral Growth after Mechanical Conditioning of the Cell Wall**—R. Igor Gamow and Barbel Böttger

528 **Maintenance of High Photosynthetic Rates during the Accumulation of High Leaf Starch Levels in Sunflower and Soybean**—John R. Potter and Patrick J. Breen

532 **Loss of Tomato Cell Wall Galactan May Involve Reduced Rate of Synthesis**—Gary D. Lackey, Kenneth C. Gross, and Stephen J. Wallner

534 **Phytochrome Modifies Blue-light-induced Electrical Changes in Corn Coleoptiles**—Richard H. Racusen and Arthur W. Galston

Number 4. October

537 **Metabolism of 2,4-Dichlorophenoxyacetic Acid (2,4-D) in Soybean Root Callus. Evidence for the Conversion of 2,4,-D-Amino Acid Conjugates to Free 2,4-D**—Gayle H. Davidonis, Robert H. Hamilton, and Ralph O. Mumma

541 **Photosynthesis of Grass Species Differing in Carbon Dioxide Fixation Pathways. VI. Differential Effects of Temperature and Light Intensity on Photorespiration in C_3, C_4, and Intermediate Species**—R. Harold Brown and Jack A. Morgan

545 **Involvement of Phospholipids in Polyunsaturated Fatty Acid Synthesis in Developing Soybean Cotyledons**—Richard F. Wilson, Hedy H. Weissinger, Jamie A. Buck, and Gary D. Faulkner

550 **Corn Root Protoplasts. Isolation and General Characterization of Ion Transport**—Willy Lin

555 **Oxidation of NADH in Glyoxysomes by a Malate-Aspartate Shuttle**—Irvin J. Mettler and Harry Beevers

561 **An Improved Method for Detecting Auxin-induced Hydrogen Ion Efflux from Corn Coleoptile Segments**—Michael L. Evans and Mary Jo Vesper

566 **Effect of 1-Aminocyclopropane-1-Carboxylic Acid on the Production of Ethylene in Senescing Flowers of *Ipomoea tricolor* Cav.**—Jörg R. Konze, Jennifer F. Jones, Thomas Boller, and Hans Kende

572 **Isolation and Characterization of Chloroplast DNA from the Duckweed *Spirodela oligorrhiza***—Jan H. van Ee, Willem A. Man in 't Veld, and Rudi J. Planta

576 **Influence of Anaerobiosis on Chlorophyll Biosynthesis in Greening Oat Seedlings (*Avena sativa* L.)**—Siegrid Schoch, Christa Hehlein, and Wolfhart Rüdiger

580 **A Differential Effect of Race T Toxin on Dark and Photosynthetic CO_2 Fixation by Thin Leaf Slices from Susceptible Corn**—J. M. Daly and Balázs Barna

584 **Preparation and Characterization of a Highly Active Cell-free Protein-synthesizing System from Dry Pea Primary Axes**—Willy J. Peumans, Albert R. Carlier, and Bernard M. Delaey

588 **Carrier Protein-mediated Transport of Neutral Amino Acids into Mung Bean Mitochondria**—Anthony J. Cavalieri and Anthony H. C. Huang

592 **Light—Shade Adaptation. Two Strategies in Marine Phytoplankton**—Paul G. Falkowski and Thomas G. Owens

596 **Thermotropic Properties of Thermophilic, Mesophilic, and Psychrophilic Blue-green Algae**—Chang-Hwei Chen and Donald S. Berns

600 **Time Course of Induction of Cytochrome P-450, NADPH-Cytochrome *c* Reductase, and Cinnamic Acid Hydroxylase by Phenobarbital, Ethanol, Herbicides, and Manganese in Higher Plant Microsomes**—Danièle Reichhart, Jean-Pierre Salaün, Irène Benveniste, and Francis Durst

605 **Thioredoxin-like Activity of Thylakoid Membranes. Thioredoxin Catalyzing the Reductive Inactivation of Glucose-6-Phosphate Dehydrogenase Occurs in Both Soluble and Membrane-bound Form**—Anthony R. Ashton, Thomas Brennan, and Louise E. Anderson

609 **Host Recognition in the *Rhizobium*-Soybean Symbiosis**—Gary Stacey, Alan S. Paau, and Winston J. Brill

615 **Action Spectra for the Inhibition of Hypocotyl Growth by Continuous Irradiation in Light and Dark-Grown *Sinapis alba* L. Seedlings**—Christopher J. Beggs, M. Geoffrey Holmes, Merten Jabben, and Eberhard Schäfer

619 **Glutamine Synthetase in Rice. A Comparative Study of the Enzymes from Roots and Leaves**—Bertrand Hirel and Pierre Gadal

624 **Sequence of Chloroplast Degreening in Calamondin Fruit as Influenced by Ethylene and $AgNO_3$**—Albert C. Purvis

628 **Effect of Butyl 2-Hydroxy-3-Butynoate on Sunflower Leaf Photosynthesis and Photorespiration**—Sudarsanam Doravari and David T. Canvin

632 **A Nitrate Reductase-less Variant Isolated from Suspension Cultures of *Datura innoxia* (Mill.)**—John King and Vinod Khanna

637 **Development of Mitochondrial Activities in Pea Cotyledons. Influence of Desiccation during and following Germination of the Axis**—Yukio Morohashi and J. Derek Bewley

641 **Long Chain (C_{20} and C_{22}) Fatty Acid Biosynthesis in Developing Seeds of *Tropaeolum majus*. An *in Vivo* Study**—Michael R. Pollard and Paul K. Stumpf

649 **Biosynthesis of C_{20} and C_{22} Fatty Acids by Developing Seeds of *Limnanthes alba*. Chain Elongation and Δ5 Desaturation**—Michael R. Pollard and Paul K. Stumpf

656 **Effect of Glyphosate on Intact Bean Plants (*Phaseolus vulgaris* L.) and Isolated Cells**—Barry J. Brecke and William B. Duke

660 **Polyunsaturated Fatty Acid Biosynthesis in Cotyledons from Germinating and Developing *Cucumis sativus L.* Seedlings**—Denis J. Murphy and Paul K. Stumpf

666 ***In Vivo* Pathway of Oleate and Linoleate Desaturation in Developing Cotyledons of *Cucumis sativus L.* Seedlings**—Denis J. Murphy and Paul K. Stumpf

672 **Changes in the Levels of Abscisic Acid and Its Metabolites in Excised Leaf Blades of *Xanthium strumarium* during and after Water Stress**—Jan A. D. Zeevaart

679 **Comparison of the Levels of Six Endogenous Gibberellins in Roots and Shoots of Spinach in Relation to Photoperiod**—James D. Metzger and Jan A. D. Zeevaart

684 **Isolation of Tonoplast Vesicles from Tobacco Protoplasts**—Donald P. Briskin and Robert T. Leonard

688 **Biochemical Characterization of a Catalase Inhibitor from Maize**—John C. Sorenson and John G. Scandalios

692 **Effects of Boron Deficiency on ^{86}Rubidium Uptake and Photosynthesis in the Diatom *Cylindrotheca fusiformis***—Douglas A. Smyth and W. Mack Dugger

696 **Further Characterization of the *in Vitro* Binding of Phytochrome to a Membrane Fraction Enriched for Mitochondria**—Thomas E. Cedel and Stanley J. Roux

704 **Modulation of a Mitochondrial Function by Oat Phytochrome *in Vitro***—Thomas E. Cedel and Stanley J. Roux

710 **On the Gaseous Exchange of Ammonia between Leaves and the Environment: Determination of the Ammonia Compensation Point**—Graham D. Farquhar, Peter M. Firth, Robbert Wetselaar, and Brian Weir

715 **Tocopherol and Organic Free Radical Levels in Soybean Seeds during Natural and Accelerated Aging**—David A. Priestley, Murray B. McBride, and Carl Leopold

720 **Evaluation of the Relative Ureide Content of Xylem Sap as an Indicator of N_2 Fixation in Soybeans**—Peter R. McClure, Daniel W. Israel, and Richard J. Volk

726 **Replication of DNA by Nuclei Isolated from Soybean Suspension Cultures**—Ruth Roman, Michel Caboche, and Karl G. Lark

731 **Characterization of α-Galactosidase from Cucumber Leaves**—Elizabeth L. Smart and David M. Pharr

735 **Biosynthesis of Ureides from Purines in a Cell-free System from Nodule Extracts of Cowpea (*Vigna unguiculata* (L) Walp.)**—K. C. Woo, Craig A. Atkins, and John S. Pate

740 **Metabolism of *myo*-(2-^{3}H)Inositol and *scyllo*-(R-^{3}H)-Inositol in Ripening Wheat Kernels**—Ken Sasaki and Frank A. Loewus

746 **Increase in Dry Weight and Total Nitrogen Content in *Zea mays* and *Setaria italica* Associated with Nitrogen-fixing *Azospirillum* spp.**—Efraim Cohen, Yaacov Okon, Jaime Kigel, Israel Nur, and Yigal Henis

750 **Abscission of Citrus Leaf Explants. Interrelationships of Abscisic Acid, Ethylene, and Hydrolytic Enzymes**—Oded Sagee, Raphael Goren, and Joseph Riov

754 **Regulation of Photosynthetic Electron Transport in Intact Spinach Chloroplasts. II. Mechanism of Salt-induced Increase in Oxaloacetate Photoreduction**—A. Bryan MacKay and Thomas V. Marsho

758 **Identification of Selenocysteine in the Proteins of Selenate-grown *Vigna radiata***—Terence A. Brown and Alex Shrift

762 **Interaction between External and Internal Conditions in the Development of Photosynthetic Features in a Grass Leaf. I. Regional Responses along a Leaf during and after Low-Light or High-Light Acclimation**—Jean-Louis Prioul, Judy Brangeon, and Agnès Reyss

770 **Interaction between External and Internal Conditions in the Development of Photosynthetic Features in a Grass Leaf. II. Reversibility of Light-induced Responses as a Function of Developmental Stages**—Jean-Louis Prioul, Judy Brangeon and Agnès Reyss

775 **Synthesis of 4,5,6,7 and 2,4,5,6,7 Deuterium-labeled Indole-3-Acetic Acid for use in Mass Spectrometric Assays**—Volker Magnus, Robert S. Bandurski, and Aga Schulze

782 **Changes in Activities of Enzymes of Nitrogen Metabolism in Seedcoats and Cotyledons during Embryo Development in Pea Seeds**—David R. Murray and Ivan R. Kennedy

Number 5. November

787 **Purification and Characterization of a Salt-extractable Hydroxyproline-rich Glycoprotein from Aerated Carrot Discs**—David A. Stuart and Joseph E. Varner

793 **Changes of Endogenous Gibberellin-like Substances with Sex Reversal of the Apical Inflorescence of Corn**—Stewart B. Rood, Richard P. Pharis, and David J. Major

797 **Copper-mediated Lipid Peroxidation Processes in Photosynthetic Membranes**—Gerhard Sandmann and Peter Böger

801 **Changes in Membrane Lipids of Roots Associated with Changes in Permeability. I. Effects of Undissociated Organic Acids**—Patricia C. Jackson and Judith B. St. John

805 **Regulation of Glutamine Synthetase by Light and during Nitrogen Deficiency in Synchronous *Chlorella sorokiniana***—Rudolf Tischner and Aloys Hüttermann

809 **Comparative Resistance of the Soil and the Plant to Water Transport**—Wayne E. Blizzard and John S. Boyer

815 **Inhibition by Catalase of Dark-mediated Glucose-6-Phosphate Dehydrogenase Activation in Pea Chloroplasts**—Thomas Brennan and Louise E. Anderson

818 **Photosynthetic HCO_3^- Utilization and OH^- Excretion in Aquatic Angiosperms. Light-induced pH Changes at the Leaf Surface**—Hidde B. A. Prins, Jan F. H. Snel, Riender J. Helder, and Pieter E. Zanstra

823 **The Site of the Inhibition of the Shikimate Pathway by Glyphosate. I. Inhibition by Glyphosate of Phenylpropanoid Synthesis in Buckwheat (*Fagopyrum esculentum* Moench)**—Heike Holländer and Nikolaus Amrhein

830 **The Site of the Inhibition of the Shikimate Pathway by Glyphosate. II. Interference of Glyphosate with Chorismate Formation *in Vivo* and *in Vitro***—Nikolaus Amrhein, Brigitte Deus, Peter Gehrke, and Hans Christian Steinrücken

835 **Effects of Divalent Cations and Polyethylene Glycol on the Membrane Fluidity of Protoplast**—Wendy F. Boss and Ralph L. Mott

838 **Microheterogeneity of Globulin-1 Storage Protein from French Bean with Isoelectrofocusing**—John W. S. Brown, Fredrick A. Bliss, and Timothy C. Hall

841 **Ethylene Production by Chilled Cucumbers (*Cucumis sativus* L.)**—Chien Yi Wang and Douglas O. Adams

844 **Effect of Photoperiod on the Levels of Endogenous Gibberellins in Spinach as Measured by Combined Gas Chromatography-selected Ion Current Monitoring**—James D. Metzger and Jan A. D. Zeevaart

847 **A New Bacterial Agglutinin from Soybean. I. Isolation, Partial Purification, and Characterization**—William Frederick Fett and Luis Sequeira

853 **A New Bacterial Agglutinin from Soybean. II. Evidence against a Role in Determining Pathogen Specificity**—William F. Fett and Luis Sequeira

859 **Growth-sustaining Water Potential Distribution in the Primary Corn Root. A Noncompartmented Continuum Model**—Wendy Kuhn Silk and Kit K. Wagner

864 **Characterization of the Spinach Leaf Phosphorylases**—Jack Preiss, Thomas W. Okita, and Elaine Greenberg

870 **Starch Degradation in Spinach Leaves. Isolation and Characterization of the Amylases and R-Enzyme of Spinach leaves**—Thomas W. Okita and Jack Preiss

877 **Regulation of Sulfate Assimilation in Tobacco Cells. Effect of Nitrogen and Sulfur Nutrition on Sulfate Permease and *O*-Acetylserine Sulfhydrylase**—Ivan K. Smith

884 **Alkali Cation/Sucrose Co-transport in the Root Sink of Sugar Beet**—Robert A. Saftner and Roger E. Wyse

890 **Membrane Lipid Breakdown in Relation to the Wound-induced and Cyanide-resistant Respiration in Tissue Slices. A Comparative Study**—Athanasios Theologis and George G. Laties

897 **Peptide Mapping Reveals Considerable Sequence Homology among the Three Polypeptide Subunits of G1 Storage Protein from French Bean Seed**—Yu Ma, Fredrick A. Bliss, and Timothy C. Hall

903 **Phytochrome Pelletability Induced By Irradiation *in Vivo*. Test for *in Vitro* Binding of Added [^{35}S]Phytochrome**—Lee H. Pratt

908 **Phytochrome Pelletability Induced by Irradiation *in Vivo*. Mixing Experiments**—Peter H. Quail and Winslow R. Briggs

911 **Protection of Cellulose Synthesis in Detached Cotton Fibers by Polyethylene Glycol**—Nicholas C. Carpita and Deborah P. Delmer

917 **Carbon Dioxide and Water Vapor Exchange in the Crassulacean Acid Metabolism Plant *Kalanchoë* Pinnáta during a Prolonged Light Period. Metabolic and Stomatal Control of Carbon Metabolism**—Klaus Winter

922 **Biochemistry of Fern Spore Germination. Glyoxylate and Glycolate Cycle Activity in *Onoclea sensibilis* L.**—Augustus E. DeMaggio, Carolyn Greene, and David Stetler

925 **Efficiency of Hydrogen Photoproduction by Chloroplast-Bacterial Hydrogenase Systems**—A. A. Krasnovsky, Chan Van Ni, V. V. Nikandrov, and G. P. Brin

931 **Diffusional Contribution to Carbon Isotope Fractionation during Dark CO_2 Fixation in CAM Plants**—Marion H. O'Leary and C. Barry Osmond

935 **Catabolism of Adenine Derivatives in Leaves. Study of the Role of Light on the *in Vivo* Activity of Xanthine Dehydrogenase**—Jacqueline Nguyen

940 **On the Reason for the Different Photosynthetic Rates of Seedlings of *Pinus silvestris* and *Betula verrucosa***—Laila Brunes, Gunnar Öquist, and Lennart Eliasson

945 **Effect of Rapid Changes in Sink-Source Ratio on Export and Distribution of Products of Photosynthesis in Leaves of *Beta vulgaris* L. and *Phaseolus vulgaris* L.**—Bernadette R. Fondy and Donald R. Geiger

950 **Distribution of Wheat Germ Agglutinin in Young Wheat Plants**—Michael Mishkind, Kenneth Keegstra, and Barry A. Palevitz

956 **On the Uptake, Metabolism, and Retention of [^{3}H]Gibberellin A_1 by Barley Aleurone Layers at Low Temperatures**—Brian Keith, Robin Boal, and Lalit M. Srivastava

962 ***In Vivo* Binding of Gibberellin A_1 in Dwarf Pea Epicotyls**—Brian Keith and Lalit M. Srivastava

968 **Effect of Irradiance on Development of Apparent Nitrogen Fixation and Photosynthesis in Soybean**—Larry E. Williams and Donald A. Phillips

973 **Effect of Salts on the Activity of Carrot Phosphofructokinase**—John F. Turner, J. David Tomlinson, and Robert A. Caldwell

978 **Economy of Carbon and Nitrogen in Nodulated and Non-nodulated (NO_3-grown) Cowpea [*Vigna unguiculata*(L.) Walp.]**—Craig A. Atkins, John S. Pate, Geoffrey J. Griffiths, and Shane T. White

984 **Isolation and Partial Characterization of an Acid Endoprotease Present in Dormant Apple Shoot Bark**—Seong-Mo Kang and John S. Titus

990 **Promotion of Sink Activity of Developing Rose Shoots by**

Light—Yoram Mor and Abraham H. Halevy
996 **Characterization of the Light Reaction in Promoting the Mobilizing Ability of Rose Shoot Tips**—Yoram Mor, Abraham H. Halevy and Dan Porath
1001 **Characteristics and Subcellar Localization of Phospholipase D and Phosphatidic Acid Phosphatase in Mung Bean Cotyledons**—Eliot M. Herman and Maarten J. Chrispeels
1008 **Effect of Steric and Nuclear Changes in Steroids and Triterpenoids on Sexual Reproduction in *Phytophthora cactorum***—William David Nes, Glenn Wayne Patterson, and George Albert Bean
1012 **Transfer RNA-Peroxidase Interaction. Inhibition of Indole-3-Acetic Acid Oxidation**—Tsung T. Lee
1015 **Effects of pH and Ethephon on Betacyanin Leakage from Beet Root Discs**—Michael S. Reid, Jack L. Paul, and Roy E. Young
1017 **Corrections**

Number 6. December

1019 **Polygalacturonase Activity and Ethylene Synthesis during Cucumber Fruit Development and Maturation**—Mikal E. Saltveit, Jr., and Roger F. McFeeters
1024 **Phytochrome Responses to End-of-Day Irradiations in Light-grown Corn Grown in the Presence and Absence of Sandoz 9789**—Holly L. Gorton and Winslow R. Briggs
1027 **Early Events in the Infection of Soybean (*Glycine max* L. Merr) by *Rhizobium japonicum*. I. Localization of Infectible Root Cells**—T. V. Bhuvaneswari, B. Gillian Turgeon, and Wolfgang D. Bauer
1032 **Effect of CO_2, O_2, and Light on Photosynthesis and Photorespiration in Wheat**—Alain Gerbaud and Marcel André
1037 **Electrophoretic Comparison of Polypeptides from Enriched Plasma Membrane Fractions from Developing Soybean Roots**—Martha L. Booz and Robert L. Travis
1044 ***In Vivo* Assay for the Synthesis of Hydroxyproline-rich Proteins**—Joseph E. Varner and Jane E. Burton
1048 **Mode of Dinitroaniline Herbicide Action. II. Characterization of [^{14}C]Oryzalin Uptake and Binding**—Mahesh K. Upadhyaya and Larry D. Noodén
1053 **Metabolic Activity and Energy Charge of Excised Maize Root Tips under Anoxia. Control by Soluble Sugars**—Pierre H. Saglio, Philippe Raymond, and Alain Pradet
1058 **Effect of pH on the Activity of Some Respiratory Inhibitors**—Chee-Kok Chin and Michael Lee
1061 **Investigation of the H_2 Oxidation System in *Rhizobium japonicum* 122 DES Nodule Bacteroids**—David W. Emerich, Tomas Ruiz-Argüeso, Sterling A. Russell, and Harold J. Evans
1067 **Light-inducible Cytochrome Reduction in Membrane Preparations from Corn Coleoptiles. I. Stabilization and Spectral Characterization of the Reaction**—Mary Helen M. Goldsmith, Roland J. Caubergs, and Winslow R. Briggs
1074 **Solubilization of the Receptor for *N*-1-Naphthylphthalamic Acid**—Michael R. Sussman and Gary Gardner
1079 **Oxygen Effect on Photosynthetic and Glycolate Pathways in Young Maize Leaves**—Jean F. Morot-Gaudry, Jack P. Farineau, and Jean C. Huet
1085 **Procyanidins (Condensed Tannins) in Green Cell Suspension Cultures of Douglas Fir Compared with Those in Strawberry and Avocado Leaves by Means of C_{18}-Reversed-phase Chromatography**—Helen A. Stafford and Hope H. Lester
1091 **S-Adenosylmethionine Decarboxylase of Corn Seedlings**—Yonezo Suzuki and Eiji Hirasawa
1095 **Relationship between ATP Level and Activity of Fusicoccin-stimulated H^+/K^+-Exchange System in Plant Tissues**—Franca Rasi-Caldogno, Raffaella Cerana, and Maria C. Pugliarello
1099 **Improved Procedure for the Estimation of Nanogram Quantities of Indole-3-acetic Acid in Plant Extracts Using the Indolo-α-pyrone Fluorescence Method**—Moritoshi Iino, Richard S.-T. Yu, and Denis J. Carr
1106 **Ethylene: Indicator but Not Inducer of Phytoalexin Synthesis in Soybean**—Inge Paradies, Jörg R. Konze, Erich F. Elstner, and Jack Paxton
1110 **Variations in $K_m(CO_2)$ of Ribulose-1,5-bisphosphate Carboxylase among Grasses**—Hock-Hin Yeoh, Murray R. Badger, and Leslie Watson
1113 **Involvement of Lipid-linked Oligosaccharides in Synthesis of Storage Glycoproteins in Soybean Seeds**—David S. Bailey, Vincenzo DeLuca, Mathias Dürr, Desh Pal S. Verma and Gordon A. Maclachlan
1119 **Model for Stress-induced Protein Degradation in *Lemna minor***—Robert J. Cooke, Keith Roberts, and David D. Davies
1123 **Hormonal Regulation of Lateral Bud (Tiller) Release in Oats (*Avena sativa* L.)**—Marcia A. Harrison and Peter B. Kaufman
1128 **Structure of Plant Cell Walls. X. Rhamnogalacturonan I, a Structurally Complex Pectic Polysaccharide in the Walls of Suspension-cultured Sycamore Cells**—Michael McNeil, Alan G. Darvill, and Peter Albersheim
1135 **Structure of Plant Cell Walls. XI. Glucuronoarabinoxylan, A Second Hemicellulose in the Primary Cell Walls of Suspension-cultured Sycamore Cells**—Janet E. Darvill, Michael McNeil, Alan G. Darvill, and Peter Albersheim
1140 **Utility of Ethidium Bromide in the Extraction from Whole Plants of High Molecular Weight Maize DNA**—Naomi Kislev and Irwin Rubenstein
1144 **Light Harvesting in *Anacystis nidulans* Studied in Pigment Mutants**—Jack Myers, Jo-Ruth Graham, and Richard T. Wang
1150 **Polyphenol Oxidation by *Vicia faba* Chloroplast Membranes. Studies on the Latent Membrane-bound Polyphenol Oxidase and on the Mechanism of Photochemical Polyphenol Oxidation**—Steven W. Hutcheson, Bob B. Buchanan, and Paolo Montalbini
1155 **Water-relation Parameters of Individual Mesophyll Cells of the Crassulacean Acid Metabolism Plant *Kalanchoë daigremontiana***—Ernst Steudle, J. Andrew C. Smith, and Ulrich Lüttge.
1164 **Leaf Senescence and Abscisic Acid in Leaves of Field-grown Soybean**—Joyce S. Samet and Thomas R. Sinclair
1169 **Properties of a Membrane-bound Phosphatase from the Thylakoids of Spinach Chloroplasts**—R. Michael Mulligan and N. E. Tolbert
1174 **Zinc-inhibited Electron Transport of Photosynthesis in Isolated Barley Chloroplasts**—Baishnab C. Tripathy and Prasanna Mohanty
1179 **Relationship between Nitrate Uptake, Flux, and Reduction and the Accumulation of Reduced Nitrogen in Maize (*Zea mays* L.). I.Genotypic Variation**—Andrew J. Reed and Richard H. Hageman
1184 **Relationship between Nitrate Uptake, Flux, and Reduction and the Accumulation of Reduced Nitrogen in Maize (*Zea mays* L.). II. Effect of Nutrient Nitrate Concentration**—Andrew J. Reed and Richard H. Hageman

1190 Auxin Transport Inhibitors. IV. Evidence of a Common Mode of Action for a Proposed Class of Auxin Transport Inhibitors: the Phytotropins—Gerard F. Katekar and Art E. Geissler

1196 Effect of Temperature on Glycerol Retention in the Halotolerant Algae *Dunaliella* and *Asteromonas*—Klaus Wegmann, Ami Ben-Amotz, and Mordhay Avron

1198 Apparent Bicarbonate Uptake and Possible Plasmalemma Proton Efflux in *Chara corallina*—Jack M. Ferrier

1200 Influence of After-ripening on Phytochrome Control of Seed Germination in Two Varieties of Lettuce (Lactuca sativa L.)—Yoshihiro Suzuki, Yasuhiko Soejima, and Tsuyoshi Matsui

Subject Index

A

Abscisic acid
  proline metabolism and, 230
  role in abscission, citrus leaf, 750
  study of leaf senescence, soybean, 1164
Abscission, leaflet and ethylene production, 88
Acetylene reduction
  capacity and carbon exchange rate, 101
  Michaelis constant for, 126
  Spartina, 276
O-acetylserine sulfhydrylase nitrogen and sulfur nutrition effects, tobacco, 877
Acid
  abscisic, accumulation during water stress, *X. strumarium*, 672
  acetic, butyric, formic, glutaric, propionic, permeability change, barley root, 801
  fatty, metabolism in *C. sativus* cotyledon, 660, 666
  linoleic, desaturation, *C. sativus*, 660, 666
  polyunsaturated fatty, role of phospholipids in synthesis, soybean, 545
  undissociated organic, effect on lipids, barley root, 801
Action spectra, growth inhibition in *Sinapis alba* L., 615
S-Adenosylmethionine decarboxylase, enzyme activity, corn seedlings, 1091
Agglutinin, bacterial, soybean, 847, 853
Algae
  light-shade adaptation, 592
  temperature and glycerol retention in *Dunaliella* and *Asteromonas*, 1196
  thermotropic properties, 596
Aleurone layers, ^3H activity, barley, 956
Alfalfa, carbon exchange and acetylene reduction, 101
Aliphatic alcohol, effect on senescence, 395
Amino acid
  mitochondrial metabolism, bean, 588
  transport, *N. tabacum*, 261
1-aminocyclopropane-1-carboxylic acid, role in formation of C_2H_4 *I. tricolor*, 566
Ammonia, compensation point in leaf/environment exchange, 710
Amylase, activity in spinach, 870
α-Amylase, temperature effect on synthesis and secretion, barley, 466
Anabaena, photophosphorylation and electron transport, 446
Anacystis nidulans, light harvesting in pigment mutants, 1144
Anaerobiosis, influence on chlorophyll biosynthesis, oat, 576
Anoxia, metabolic activity and energy charge, corn root, 1053
Anthocyanin synthesis, reversal, 823
Apple, endoprotease in bark tissue, 984
Aquatic angiosperms, light-induced pH changes, 818
Artemisia absinthium L. (*see* Wormwood)
Asparagine formation in soybean nodule, 139
Asteromonas, temperature effect on glycerol retention, 1196
ATP
  energy source for H^+/K^+-exchange system, maize, 795
  synthesis, bicarbonate ion effect on, 242
Auxin
  -binding protein, purification, 105, 112
  -induced growth, and proton excretion, soybean, 433
  inducement of H^+ secretion, corn, 561
  transport inhibitors, 1190
Avena sativa L.
  anaerobiosis and chlorophyll biosynthesis, oat, 576
  lateral bud release and hormonal regulation, 1123
Avocado, analysis of procyanidins, 1085
Axis, embryonic, role in mitochondrial activity, pea, 70
Azospirillum, nitrogen-fixing, effect on growth in corn and grass, 746

B

Bacteroid, inhibition of H_2 uptake, 1061
Bark, protease activity, apple, 984
Barley
  aleurone layer,
    α-amylase production, 466
    effect of [^{3}H]gibberellin A, 956
    [^{3}H]GA_1 uptake, 962
  betaine synthesis and water stress, 342
  chloroplast, electron transport inhibition, 1174
  mutants screening for altered sensitivity, 153
  proline accumulation, 230
  uptake and compartmentation of gibberellin A_1, 422
Bean
  auxin binding protein, 105, 112
  globulin-1 protein analysis, 838
  mung, amino acid transport into mitochondria, 588
  oxygen exchange and light, 302
Beet, alkali cation/sucrose co-transport, 884
Beet root discs, betacyanin leakage, 1015
Beta vulgaris L.
  protoplast and vacuole isolation, 25
  rapid change in sink-source ratio, beet, 945
Beta vulgaris L. (*see also* Sugar beet)
Betacyanin, leakage, effect of pH and Ethephon, beet root discs, 1015
Betaine synthesis, water stress and, barley, 342
Betula verrucosa, comparison of, photosynthetic properties, 940
Bicarbonate ions, ATP synthesis and, 242
Bicarbonate uptake, *Chara corallina*, 1198
Boron deficiency in diatoms, 692
Buckwheat, shikimate pathway and glyphosate, 823, 830
Bud, lateral, hormonal regulation of release, oat, 1123
Butyl 2-hydroxy-3-butynoate, whole leaf metabolism, sunflower, 628

C

^{14}C, distribution during photosynthesis, *Caulerpa simpliciuscula*, 29
C_2H_4
  biosynthetic pathway and production, cucumber, 841
  chlorophyllase activity and, 624
  inhibition by 2,4-dinitrophenol and temperature, mung bean, 286
  production in stress, bean, orange, tomato, 281
C_{20} and C_{22} fatty acid biosynthesis
  L. alba, 649
  T. majus, 641
Cadmium, toxicity, tomato, 438
Calamondin, chlorophyllase activity, 624
Carbohydrate, during nitrogen fixation, soybean nodule, 471
Carbon dioxide
  accumulation in *C. reinhardtii*, 407
  water vapor exchange and, CAM plant, 917
Carbon
  activity in nodulated and non-nodulated cowpea, 978
  exchange rate and acetylene-reduction, 101
  metabolism, metabolic and stomatal control, CAM plant, 917
  pool, internal inorganic, *C. reinhardtii*, 407
Carboxylase, isotope discrimination, CAM plants, 931
Carrot
  hydroxyproline-rich glycoprotein, 787
  salts and phosphofructokinase, 973
Catalase
  inhibition of glucose-6-phosphate dehydrogenase activation, pea, 815
  inhibitor, biochemical characterization of, maize, 688
Caulerpa simpliciuscula
  chloroplast isolation, 29
  ultrastructure and enzyme distribution, 130
Cell
  callus, glycine accumulation, tobacco, 334
  damage by centrifugation, pea, 321
  dehydration and freezing, rye, 349
  freeze-thaw damage, *A. alnifolia*, 74
  water storage capacity, CAM plant, 1155
Cell-free system
  mRNA translation, pea, 584
  ureide synthesis, cowpea, 735
Cell wall
  component, glucuronoarabinoxylan, sycamore, 1135
  galactan production, tomato, 532
  pectic polysaccharide and, sycamore, 1128
Cellulose, synthesis in detached cotton fibers, 911
Centrifugation, cell damage, pea, 321
Chara corallina,
  alkaline band transport system, 46
  bicarbonate uptake, 1198
Chenopodium bonus-henricus L., secondary dormancy in, 175
Chilling (*see* Temperature)
Chitosan, pea-*Fusarium solani* interaction, 199, 205
Chlamydomonas, hydroxyproline-rich glycoprotein, 787
Chlamydomonas reinhardtii, carbon dioxide-concentrating mechanism, 407
Chloramphenicol, effect on cell-free translation by polysomes, wheat, 520
Chlorella sorokiniana, glutamine synthetase activation, 805
Chlorophyll
  anaerobiosis and biosynthesis, oat, 576

Chlorophyll—*continued*
elimination in mitochondrial preparation, spinach, 442
Chloroplast
activity, effect of temperature on, spinach, pea, 234
bicarbonate and ATP synthesis, 242
^{14}C distribution, 29
degreening, influence of ethylene and $AgNO_3$, calamondin, 624
development protoplasts in study of, 1
DNA, loss in red light, *Euglena*, 295
H_2 photoproduction, pea, 925
inhibition of photosynthesis, spinach, 187
membrane, in polyphenol oxidation, *V. faba*, 1150
phosphatase, spinach, 1169
purity, determination, 130
replication, photomorphogenic regulation, *Euglena*, 295
separation procedure, *Euglena*, 291
spinach, salt and oxaloacetate reduction, 754
Citrus explants, abscisic acid role in abscission, 750
CO_2
fixation, race T toxin effect, corn, 580
O_2 and light, effect on photosynthesis and photorespiration, wheat, 1032
Cold, acclimation, *Solanum* species, 414
Cold (*see also* Temperature)
Coleoptiles, phototropic response to light, 534
Copper
phytotoxic effect on electron transport system, spinach, 797
toxicity, mung bean, 272
Corn
auxin-induced H^+ secretion, 561
Azospirillum-associated increase in dry weight and nitrogen content, 746
coleoptiles, phototropic response, 534
endosperm, ribonuclease in, 119
gibberellin effect on sexuality, 793
light-inducible cytochrome reduction, 1067
nitrate reductase activation, 212
phosphoenolpyruvate carboxylase synthesis, 505
race T toxin and CO_2 fixation, 580
root growth, sustaining water potential, 859
root protoplast, ion transport, 550
S-adenosylmethionine decarboxylase activity in seedling, 1091
Sandoz 9789 and, phytochrome response to irradiation, 1024
toxicity in mitochondria and protoplasts, 477
Correction, 197, 1017
Volume
57:154
64:289, 290, 292, 541, 646, 754, 1084, 1087
65:533, 871, 1166
66:25, 477
Cotton, cellulose synthesis in detached fibers, 911
Cotyledon, role in phototropic response, *L. cretica*, 82
Cowpea
nodule function and NO_3, 978
purine-based pathway ureide synthesis, 735
uptake and compartmentation of gibberellin A, 422
Crassulacean acid metabolism plant
carbon isotope fractionation, 931
CO_2 and water vapor exchange, 917
quantum requirement for photosynthesis, *S. praealtum*, 463
vacuole isolation, 379
Crassulacean acid metabolism plant (*see Kalanchoë daigremontiana*
Cucumber
α-galactosidase in leaves, 731
C_2H_4 production and chilling, 841
polygalacturonase activity and ethylene synthesis, 1019
protochlorophyll biosynthesis inhibitor in, 142
Cucumis sativus L., polyunsaturated fatty acid biosynthesis, 660, 666
Cyanide-insensitive O_2 uptake, wheat, 488
Cyanide resistance, potato, 171
Cyanide resistant respiration and membrane lipid breakdown, 890
Cylindrotneca fusiformis, boron deficiency effects, 692
Cytochrome, reduction, light-induced, corn
Cytochrome P-450, microsomal hydroxylating process, artichoke, 600

D

Datura innoxia (Mill.), nitrate reductase-less variant, isolation in, 632
Dehydration
cellular, and freezing injury, rye, 349
effect on leakage and membrane structure, *L. corniculatus* L., 316
Desiccation, mitochondrial development and, pea, 637
Deuterium, standard for indole acetic acid assay, 775
Diatom, boron deficiency and ^{86}rubidium uptake, 692
Diazotrophs, nitrogenase activity, 276
2,4-Dichlorophenoxyacetic acid, metabolism, soybean, 537
Dicot
phase separation, 238
phototropic response in seedling, 82
Digitonin, steryl glycoside biosynthesis and, spinach, 257
2,4-Dinitrophenol inhibition of ethylene production, mung bean, 286
Divalent cations, effect on membrane fluidity of protoplast, 835
DNA
chloroplast, isolation in *S. oligorrhiza*, 572
high molecular weight, extraction from maize, 1140
replication, in soybean, 726
Dormancy, control in *Chenopodium bonus-henricus* L, 175
Douglas fir, analysis of procyanidins, 1085
Dunaliella, temperature effect on glycerol retention, 1196

E

Electron spin resonance, fluidity change measurement, 835
Electron transport
pathway, malate oxidation and, cauliflower, potato, 457
phosphorylation and, *Anabaena*, 446
temperature induced changes in, spinach, pea, 234
Embryo, enzyme changes during development, pea, 782
Endoplasmic reticulum, hydrolase accumulation and, 390
role of phospholipid activity, 1001
Endoprotease, apple shoot bark, 984
Endosperm, metabolic processes of, development, corn, 119
Energy charge
sugar concentration and depletion effect, maize root tips, 516
under anoxia, corn root, 1053
Enzyme
chloroplast, activation, 34
cytoplasmic, isolation in pollen, 400
distribution in subcellular fractions, 130
hydrolytic, in abscission of citrus leaf explant, 750
inhibitor, corn seed germination, 1091
nitrogen metabolism, 782
-R, chloroplast associated, 870
Erucic acid, biosynthesis, *Tropaeolum majus*, 641
Ethane production in *P. tricornutum*, 215
Ethanol, effect on Cyt P-450 content and hydroxylase activity, artichoke, 600
Ethephon, effect on betacyanin leakage, beet root discs, 1015
Ethidium bromide in DNA extraction, maize, 1140
Ethylene
binding component, bean, 404
chilling-induced production, cucumber, 841
in abscission of citrus leaf explant, 750
leaf abscission and, 88
potato slice aging and, 171
production in *P. tricornutum*, 215
role in phytoalexin synthesis, 1106
stress produced, bean, orange, tomato, 281
synthesis in cucumber, 1019
Ethylene-binding component, purification of, bean, 404
Etioplast, *in vitro* development, 1
Eucalyptus rupicola, water loss, 254
Euglena gracilis
chloroplast replication, 295
plastid isolation, 291

F

Fern, spore germination, 922
Flax, GDP-L-fucose synthesis, 326
Flooding tolerance in *F. pennsylvanica*, 267
Flowering, *Pharbitis nil*, effect of photoperiod, 13
Fluidity change, response to divalent cation, 835
Fraxinus pennsylvanica, flooding tolerance, 267
Freeze-thaw cell damage in *A. alnifolia*, 74
Freezing, intracellular, in woody xylem, 40
Frost (*see* Cold)
Fusarium solani and pea endocarp, enzyme activity, 199, 205
Fusicoccin
binding, oat, 353
effects on ATP level, O_2 and K^+ uptake, maize, 1095

G

Galactan loss and reduced rate of synthesis, tomato, 532
α-Galactosidase
activity, legume, 375
two forms in cucumber leaves, 731
Gas, stomatal diffusion, 250
Geotropic response, inhibitor, 1190
Germination
control of dormancy, chenopodium seeds, 175
enhancement by prechilling, lettuce, 220

Gibberellin
distribution in roots and shoots, spinach, 679
endogenous, stem growth, spinach, 844
sexuality of corn, 793
Gibberellin A_1, uptake and subcellular compartmentation, barley, cowpea, 422
[^{3}H]Gibberellin A_1
activity in barley aleurone layers, 956
in vivo binding, pea, 962
Globoid crystals, content analysis, wheat grain, 494
G1 globulin, peptide mapping, french bean seed, 897
Globulin-1 protein, isoelectrofocusing analyses, bean, 838
Glucose-6-phosphate dehydrogenase
activation, inhibition by catalase, pea, 815
thioredoxin activity, pea, 605
Glucose 6-phosphate oxidation, oxidative and glycolytic pathways, 8
Glucuronoarabinoxylan in cell wall of sycamore, 1135
Glutamine synthetase
in rice, 619
light activation of, during nitrogen metabolism, *Chlorella*, 805
Glutathione reductase, response to oxygen enrichment, cotton, 482
Glutelin, as N sink, maize, 330
Glycerol retention in algae, temperature effect, 1196
Glycerolipids, fatty acid composition, *C. sativus*, 666
Glycine hydroxamate resistance, tobacco, 334
Glycine max, thiamin pyrophosphotransferase activity, 308, 313
Glycine max (L). Merrill cv. Clark, new bacterial agglutinin, 847, 853
Glycolate pathway
during spore germination, fern, 922
O_2 effect, corn leaf, 1079
Glycoprotein
hydroxyproline-rich, 1044
salt extractable, hydroxyproline rich, carrot, 787
storage-, oligosaccharide involvement in synthesis of, soybean, 1113
Glyoxylate pathway, during spore germination, fern, 922
Glyoxysome, oxidation of NADH, castor bean, 555
Glyphosate
effect on biosynthetic pathway, bean, 656
inhibition of shikimate pathway, 823, 830
inhibition of shikimate to chorismate, 830
Grain, sources of protein in, 164
Grass, regional light acclimation, 762, 770
variation in K_m (CO_2) of ribulose-1,5-bisphosphate carboxylase, 1110
Greening process, cucumber, 142
Growth rate, water potential distribution and, corn root, 859
Growth regulator, effect on water loss, Eucalyptus and bean, 254
Guanosine 5′-diphosphate L-fucose synthesis, flax, 326

H

H_2 oxidation system in bacteroids, 1061
HCO_3^-, utilization by aquatic angiosperms, 818
Helianthus annuus L. (*see* Sunflower)
Helminthosporium maydis Race T, toxicity in mitochondria and protoplasts, corn, 477
Hemagglutinin activity, legume, 375
Hemicellulose, in cell wall, sycamore, 1128, 1135
Herbicide
2,4-dichlorophenoxyacetic acid, soybean callus, 537
effect on Cyt P-450 content and hydroxylase activity, artichoke, 600
oryzalin, in corn root, 1048
Sandoz 9789, phytochrome response, corn, 1024
Herbicide (*see also* Glyphosate)
Hexanal production in *P. tricornutum*, 215
Hirschfeldia incana (*see* Mustard)
Histone kinase activity, soybean, 360, 368
Hormone
effect on release of lateral bud, and root primordia, oat, 1123
sensitivity, alteration in barley mutants, 153
Hybrid nitrate supply effect on nitrogen metabolism, maize, 1179, 1184
Hydrogen ion secretion, auxin induced, corn, 561
Hydrogen photoproduction by chloroplast-bacterial hydrogenase system, 925
Hydrolase accumulation, endoplasmic reticulum and, mung bean, 390
Hydroponic culture, nitrogenase activity of *Spartina* in, 276
Hypocotyl phosphoprotein phosphatase, 368

I

Indole-3-acetic acid
deuterium labeled, synthesis, 775
extraction and determination in nanogram range, maize, 1099
inhibition of oxidation by tRNA, 1012
Indolo-α-pyrone fluorescence method, determining indole-3-acetic acid, corn, 1099
Inhibitor, binding to potato invertase, 451
D-*chiro*-Inositol, in soybean nodules, 471
myo-[2-^{3}H]Inositol, metabolism in wheat kernels, 740
Invertase
cell wall-bound, purification, sugar beet, 93
inhibitor activity, potato tuber, 451
Ion
absorption, glyphosate inhibition, bean, 656
co-transport mechanism, sugar beet, 884
transport, corn root protoplasts, 550
Ipomoea tricolor, C_2H_4 production, 566
Irradiance, effect on nitrogen fixation and photosynthesis, soybean, 968
Irradiation
growth inhibition in *Sinapis alba* L., 615
phytochrome pelletability, oat, 903, 908
Isoelectrofocusing, analysis of protein, bean, 838
Isoline
estimate of N_2 fixation, soybean, 61
^{15}N distribution in, soybeans, 57
Isotope fractionation
in CAM plants, 931
N_2 fixation and NO_3^- uptake, association, 51

K

K^+, uptake with fusicoccin, corn, 1095
K_m (CO_2), value, of ribulose-1,5-bisphosphate carboxylase, grass, 1110
Kalanchoë daigremontiana, water-relation parameters of leaf mesophyll cells, 1155
Kalanchoë pinnata, carbon metabolism, 917
Kelp
movement of THO and tritium labeled assimilate, 66
Kinetic parameter, estimation, legumes, 126

L

Lactuca sativa L. (*see* Lettuce)
Lavatera cretica, phototropic response, 82
Leaf
abscission and ethylene production, *M. azédarach* L., 88
ammonia absorption, *P. vulgaris*, 710
elongation, diurnal pattern, rice, 147
senescence, soybean, 1164
xanthine dehydrogenase and role of light, 935
Lectin
isolation from soybean, 847, 853
Rhizobium-binding, 609
wheat germ-derived, 950
Legume
α-galactosidase-hemagglutinin activities, 375
nitrogenase activity of, 126
Legumin, subunit in protein synthesis, pea, 510
Lemna minor, stress-induced protein degradation, 1119
Lens esculenta (see Lentil)
Lentil, nodulation and nitrogen fixation, 78
Lettuce
germination enhancement by prechilling, 220
after ripening and seed germination, 1200
L-Leucine uptake, *N. tabacum*, 261
Ligand, specificity, of auxin-binding protein, 112
Light
acclimation in grass leaf, 762, 770
adaptation, reversibility in grass leaf, 770
effect on
growth in *Sinapis alba* L., 615
in vivo activity of xanthine dehydrogenase in leaves, 935
sink activity, rose shoot, 990, 996
electrical response of corn coleoptile cells to, 534
induced cytochrome reduction, corn, 1067
synthesis stimulation of phosphoenolpyruvate carboxylase, corn, 505
Light-shade adaptation, in marine phytoplankton, 592
Limnanthes alba, C_{20} and C_{22} fatty acid biosynthesis, 649
Lincomycin, effect on cell-free translation by polysomes, wheat, 520
Linum usitatissimum (*see* Flax)
Lipid
membrane, and permeability, 801
peroxidation, copper-mediated, spinach, 797
Lolium multiflorum (*see* Grass)
Lotus corniculatus L., membrane damage, 316

M

Macrocystis integrifolia (*see* Kelp)
Maize
catalase inhibitor of, 688
exogenous sugars and metabolism in root tips, 516
extraction of high molecular weight DNA, 1140
nitrate reductase and protease activity, 164
oxygen effect on photosynthetic and glycolate pathway in leaf, 1079
zein and glutelin as N sinks, maize, 330

Maize (*see Zea mays*)
Malate-aspartate shuttle in oxidation of NADH, 555
Malate oxidation
cyanide-insensitive, cauliflower, potato, 457
effect of NAD^+, potato, bean, 225
Manganese, effect on Cyt P-450 content and hydroxylase activity, artichoke, 600
Marine phytoplankton, light-shade adaptation, 592
Melia azedarach L., ethylene production and leaflet abscission, 88
Membrane
dehydration damage, *L. corniculatus* L., 316
fractionation, spinach, 428
injury at freezing temperatures, *A. alnifolia*, 74
Membrane lipid breakdown, wound-induced respiration and, 890
Methionine
conversion to C_2H_4, *I. tricolor*, 566
in metabolic process, 182
(−)−Methyl jasmonate senescence promotion, oat, 246
Microbody density during glyoxysome peroxisome transition of cotyledons, mustard, 194
Mineral storage, in protein bodies, wheat, 494
Mitochondria
amino acid metabolism, bean, 588
chlorophyll-free, preparation method, spinach, 442
cyanide-insensitive respiration, wheat, 488
development, pea cotyledons, 70
influence of desiccation, pea, 637
malate oxidation in, potato, bean, 225, 457
phytochrome binding, oat, 696
phytochrome regulation, oat, 704
Mung bean
biosynthesis of wound ethylene, 281
copper toxicity, 272
ethylene-binding component, 404
hydrolase accumulation, 390
storage protein breakdown in cotyledon, 1001
water loss, 254
Mustard
glyoxysome peroxisome transformation, 194
oxygen exchange and light, 302
Mutants
photosystem II, in *Zea mays*, 18
pigment, in *A. nidulans*, 1144
with altered hormone sensitivity, barley, 153

N

N_2
fixation, associated with isotopic fractionation, 51
isolines of soybean, 61
^{15}N
distribution in plant parts, 57
natural abundance, in N^2 fixation, soybean, 61
NAD^+
effect on malate oxidation in mitochondria, 225
NADH
dehydrogenase and electron transport pathway, 457
oxidation in glyoxysomes, 555
N-1-naphthylphthalamic acid, receptor protein, corn, 1074
Nicotiana glutinosa (*see* Tobacco)
Nicotiana tabacum, amino acid transport, 261
Nitrate
assimilation and reduced nitrogen, maize, 1179, 1184
uptake, marine diatom, 383
Nitrate reductase
absence in *D. innoxia*, 632
activation, corn, 212
activity in grain, 164
Nitrite production, marine diatom, 383
Nitrogen
activity in nodulated and non-nodulated cowpea, 978
deficiency and glutamine synthetase, chlorella, 805
effect of irradiance on fixation, soybean, 968
fixation
asparagine as assimilation product, 139
carbohydrates and, soybean, 471
nitrate effect on, lentil, 78
soybeans, 720
increase associated with *Azospirillum*, corn, grass, 746
metabolism and nitrate assimilation, maize, 1179, 1184
nutrition, photosynthetic response, grass species, 97
sink, role of zein and glutelin, maize, 330
NO_3^- uptake, associated with isotopic fractionation, 51
Nodule
function
in photosynthate consumption, cowpea, 978
role of carbohydrates, soybean, 471
^{15}N content, comparison with plant parts, 57
nitrate and carbohydrate effect on, *L. esculenta*, 78
Nuclei, soybean, DNA replication in, 726
Nutrient nitrate concentration and accumulation of nitrogen, maize, 1184
Nutrition, photosynthetic response to nitrogen, 97

O

O_2
CO_2 and light, effect on photosynthesis and photorespiration, wheat, 1032
fusicoccin-induced uptake, maize, 1095
Oat
leaf senescence, 395
phytochrome
mitochondrial function, 704
pelletability by irradiation, 903, 908
root, fusicoccin binding, 353
senescence promotion, 246
Octyl glucoside in thylakoid extraction, spinach, 428
OH^- ions, plasmalemma transport, *Chara corallina*, 46
Oleate biosynthesis, *T. majus*, 641
Oligomer dissociation, in enzyme activation, 34
Oligosaccharides, lipid-linked, in glycoprotein synthesis, soybean, 1113
Onoclea sensibilis, glyoxylate and glycolate cycle activity, 922
Oospore formation, sterols and, *Phytophthora*, 1008
Orange, biosynthesis of wound ethylene, 281
Organic free radical level, soybean, 715
Oryzalin, dinitroaniline herbicide action, corn root, 1048
Oxaloacetate reduction, exogenous salt and, spinach, 754
Oxidation, NADH, by malate-aspartate shuttle, 555
Oxidative pentose phosphate cycle, in chloroplast metabolism, 8
Oxygen
effect on photosynthetic and glycolate pathway, maize leaf, 1079
enrichment response in dismutase and glutathione reductase, cotton, 482
exchange, effect of light, mustard, sunflower, bean, 302

P

Pea
auxin binding protein, 105, 112
binding of [^{3}H]gibberellin A_1, 962
catalase inhibition of glucose-6-phosphate dehydrogenase activation, 815
cell-free protein-synthesizing system, 584
cotyledon
influence of desiccation, 637
mitochondrial activity, 70
endocarp and *Fusarium solani*, enzyme activity, 199, 205
enzyme change during embryo development, 782
protein synthesis in seed, 510
temperature induced changes, 234
Pea pod-*Fusarium solani* interaction in phytoalexin production, 199, 205
Pelletability
assay, phytochrome, oat, 903
induced, oat, 500
Peptide mapping for proteolytic cleavage sites, french bean, 897
Permeability change and undissociated organic acid, 801
Peroxidase interaction with tRNA, 1012
pH
changes, light and dark induced, aquatic plants, 818
of medium, effect on respiratory inhibitors, *Petunia hybrida*, 1058
Phaeodactylum tricornutum, hexanal and ethane production, 215
Pharbitis nil Choisy, carbon dioxide and flowering, 13
Phase separation, effect of temperature, dicots, 238
Phaseolus aureus Roxb. (*see* Bean)
Phaseolus vulgaris
enzyme activation in, 34
Phaseolus vulgaris L.
glyphosate effect on photosynthesis in, 656
rapid change in sink-source ratio, beet, 945
Phaseolus vulgaris (*see also* Bean)
Phenobarbital, effect on Cyt P-450 content and hydroxylase activity, artichoke, 600
Phosphatidic acid phosphatase activity in mung bean cotyledons, 1001
Phosphoenolpyruvate carboxylase, synthesis, corn, 505
Phosphofructokinase, salt activators and inhibitors, 973
Phospholipase D, activity in mung bean cotyledons, 1001
Phospholipids, role in polyunsaturated fatty acid synthesis, soybean, 545
Phosphoprotein phosphatase, soybean hypocotyls, 368
Phosphorylase, cytoplasmic and chloroplastic, spinach leaf, 864, 870

Photoperiod
comparison of gibberellin level in relation to, 679
effect on
endogenous gibberellins, spinach, 844
floral and negative development, *Pharbitis* nil, 13
Photophosphorylation, electron transport and, *Anabaena*, 446
Photoproduction of H_2 by chloroplasts, pea, 925
Photorespiration
effect of
CO_2, O_2 and light, wheat, 1032
temperature on radiation level, grass, 541
Photosynthesis
effect of
CO_2, O_2 and light, wheat, 1032
irradiance, 968
inhibition by Zn salts, barley, 1174
products of, rapid change in sink-source ratio, beet, 945
quantum requirement, *S. praealtum*, 463
rate difference in birch and pine, 940
response to nitrogen, grass, 97
starch content and, sunflower and soybean, 528
Photosynthetic pathway, O_2 effect, corn leaf, 1079
Phototropism, in *L. cretica* seedlings, 82
Phycocyanin, thermal stability, 596
Phycomyces sporangiophores, spiral growth, 525
Phytoalexin
production in fungal spores, pea, 199, 205
synthesis, role of ethylene, soybean, 1106
Phytochrome
binding to mitochondria, oat, 696
-mediated germination, lettuce, 1200
microbody density and, mustard, 194
modification and pelletability, oat, 500
pelletability
irradiation-enhanced, oat, 908
light induced, oat, 903
regulation of mitochondrial activity, oat, 704
response to irradiation with Sandoz 9789, 1024
Phytophthora cactorum, sexual reproduction, 1008
Phytotropin, auxin transport inhibitor, 1190
Pigment
mutants, light harvesting mechanism, *A. nidulans*, 1144
photosynthetic, bleaching of, 215
Pinus silvestris, comparison of photosynthetic properties, 940
Pisum sativum (see Pea)
Plasma membrane polypeptides, soybean root, 1037
Plastid structure and function, 1
in vitro study, 1
Polar auxin transport inhibitor, corn, 1074
Pollen, enzyme isolation, 400
Polyethylene glycol
effect on membrane fluidity of protoplast, 835
protection of cellulose synthesis, cotton, 911
Polygalacturonase activity in cucumber, 1019
Polypeptide
in plasma membrane fractions, soybean root, 1037
loss, in photosystem II mutants, 18
Polyphenol oxidation, photochemical mechanism, *V. faba*, 1150
Polysaccharide
capsular and extracellular, soybean, 158
extraction by centrifugation, pea, 221
pectic, in cell wall of sycamore,
Polyunsaturate fatty acid, biosynthesis, *C. sativus*, 660, 666
Polyunsaturate (*see* Acid)
Potato
cyanide-resistant O_2 consumption, 171
frost hardiness, 414
invertase inhibitor, 451
Procyanidins in Douglas fir, comparison, 1085
Proline
accumulation, abscisic acid-induced, barley, 230
hydroxylation, 1044
Protein
in amino acid transport into mitochondria, 588
phosphorylation, soybean, 360, 368
purification, bean and pea, 105, 112
receptor for *N*-1-naphthyl-phthalmic acid, corn, 1074
stress-induced degradation, *Lemma minor*, 1119
synthesis
cell-free system, pea, 584
in pea seed, 510
storage precursors, pea, 510
Protochlorophyll biosynthesis, inhibition, cucumber, 142
Proton
efflux, bicarbonate uptake and, *Chara corallina*, 1198
excretion, in auxin-induced growth, 433
Protoplast
ion transport function, corn, 550
isolation
storage tissue of *B. vulgaris* L., 25
tobacco, 684
membrane fluidity, carrot, 835
spinach, subcellular metabolite level, 187
Pulse-labeling, study of protein synthesis, pea, 510

R

Radiation level, effect on photorespiration, grass, 541
Respiration
control by soluble sugar, maize roots, 516
inhibitor, effect of pH of medium, 1058
Rhamnogalacturonan I in cell wall of dicots, 1128
Rhizobium japonicum
capsular and extracellular polysaccharides composition, 158
H_2 oxidation system, 1061
infection of soybean, 1027
-soybean, symbiosis, 609
Ribonuclease activity, in corn endosperm, 119
Ribulose-1,5-bisphosphate carboxylase, K_m (CO_2) variations, grass, 1110
Rice
glutamine synthetase, 619
leaf elongation, 147
mRNA,
translation, cell-free system, pea, 584
tRNA, inhibition of indoie-3-acetic acid oxidation, 1012
Root, soybean, infectible cells, 1027
Rose shoots, sink activity and light, 990, 996
^{86}Rubidium uptake, effects of boron deficiency diatom, 692
Rust infection, wheat, 520
Rye, protoplasts and freezing, 349

S

Salt
effect on phosphofructokinase, carrot, 973
exogenous, and oxaloacetate reduction, 754
Sandoz 9789, corn growth and, phytochrome response, 1024
Scyllo-[R-^{3}H]inositol metabolism in wheat kernels, 740
Sedum praealtum, quantum requirement in crassulacean acid metabolism, 463
Seed germination, effect of after-ripening, 1200
Selenocysteine, effect on enzyme activity in *V. radiata*, 758
Selenomethionine incorporation of, *V. radiata*, 182
Senescence
aliphatic alcohol effect, oat, 395
promotion, wormwood, 246
Setaria italica, azospirillum-associated increase in dry weight and nitrogen content, 746
Sexual reproduction, *Phytophthora cactorum*, 1008
Sexuality, alteration by gibberellin, corn, 793
Shikimate pathway, inhibition by glyphosate, buckwheat, 823, 830
Silver, effect on C_2H_4-mediated Chl destruction, calamondin, 624
Sinapis alba L., action spectra for growth inhibition, 615
Sinapis alba L. (see Mustard)
Sink activity, promotion by light, rose shoot, 990, 996
Sink-source ratio, effect of rapid change, beet, 945
Solanum (see Potato)
Soybean
asparagine formation in nodule of, 139
auxin-induced growth and proton excretion, 433
capsular and extracellular polysaccharide composition, 158
carbon exchange and acetylene reduction, 101
cotyledon, phospholipids and polyunsaturated fatty acid synthesis, 545
2,4-Dichlorophenoxyacetic acid metabolism, 537
DNA replication, 726
effect of irradiance on nitrogen fixation and photosynthesis, 968
histone kinase activity, 360, 368
infectible cells in root, 1027
leaf senescence and abscisic acid, 1164
new bacterial agglutinin, 847, 853
nitrogen fixation activity, 471
photosynthesis and starch, 528
phytoalexin synthesis, 1106
rhizobium-binding lectin, 609
root, plasma membrane polypeptides, 1037
seed, lipid-linked oligosaccharides in storage glycoprotein synthesis, 1113
soil and plant resistance to water transport, 809
thiamin pyrophosphotransferase, 308, 313
tocopherol and organic free radical levels, 715
ureide content and N_2 fixation, 720
Spinach
chlorophyll-free preparation of mitochondria, 442
chloroplast, oxidative pentose phosphate cycle, 8

Spinach—*continued*
chloroplast phosphatase, 1169
endogenous gibberellins and stem growth, 844
exogenous salts and electron transport, 754
gibberellin distribution in roots and shoots, 679
leaf, cytoplasmic and chloroplastic phosphorylases, 864, 870
phytotoxic effect of copper, 797
subcellular metabolite level, 187
temperature induced changes, 234
thylakoid extraction, 428
Spiral-growth, *Phycomyces*, 525
Spirodela oligorrhiza, chloroplast DNA isolation, 572
Standard, internal, deuterium, 775
Starch
degradation, spinach, 864, 870
effect on photosynthesis, sunflower and soybean, 528
Steroid, chemical agent in sexual cycle, *Phytophthora*, 1008
Steryl glycoside, biosynthesis inhibition, spinach, 257
Stoma, gas diffusion, 250
Strawberry, analysis of procyanidins, 1085
Stress, protein degradation and, *Lemna minor*, 1119
Stress (*see Water stress*)
Sucrose, alkali cation and anion effect on uptake, sugar beet, 884
Sugar
consumption in anoxia, corn root, 1053
indole acetic acid measurement by centrifugation, pea, 321
metabolism in storage tissue, sugar beet, 93
soluble and exogenous, maize root tips, 516
Sugar beet, role of cell wall-bound invertases, 93
Sulfate assimilation in tobacco cells, 877
Sulfur nutrition, effect on sulfate permease and *O*-acetylserine sulfhydrylase, tobacco, 877
Sunflower
butyl 2-hydroxy-3-butynoate effect on photosynthesis and photorespiration, 628
oxygen exchange and light, 302
photosynthesis and starch, 528
Superoxide dismutase, response to oxygen enrichment, cotton, 482
Sycamore, hemicellulose in cell wall, 1128, 1135
Synthesis, reduction and cell wall galactan loss, tomato, 532

T

Temperature
effect on
α-amylase, barley, 466
chloroplast activity, spinach, pea, 234
glycerol retention in algae, 1196
phase separation, dicots, 238
photorespiration, grass, 541
germination enhancement by prechilling, lettuce, 220
inhibition of C_2H_4 production, mung bean, 286
membrane damage during extracellular freezing, rye, 349
thermal stability in algae, 596
Thalassiosira pseudonana, nitrate uptake and nitrite production, 383
Thiamin
phosphorylation and germination, 308, 313
pyrophosphotransferase, activity in *Glycine max*, 308, 313
Thioredoxin in ribonucleotide and sulfate reduction, pea, 605
THO transport in *Macrocystis integrifolia*, 66
Thylakoid
extraction by octyl glucoside, spinach, 428
membrane
phosphatase activity, spinach, 1169
thioredoxin-like activity, pea, 605
Tiller (*see* Lateral bud)
Tobacco
glycine hydroxamate resistance, 334
regulation of sulfate assimilation, 877
vacuole isolation, 684
Tobacco (*see Nicotiana Tabacum*)
Tocopherol, organic free radical levels and, soybean, 715
Tomato
biosynthesis of wound ethylene, 281
cadmium toxicity, 438
Toxin
H. maydis Race T, effects in corn, 477
race T effect on CO_2 fixation, corn, 580
Triacylglycerol storage, biosynthesis of, 641, 649
Tritium labeled assimilate, transport in *M. integrifolia*, 66
Tropaeolum majus, fatty acid biosynthesis, 641

U

Ureide
determining N_2 fixation, soybean, 720
synthesis, purine-based pathway, cowpea, 735

V

Vacuole isolation from
storage tissue of *Beta vulgaris* L., 25
tobacco protoplasts, 684
in CAM plants, 379
Variant, clorate-resistant, isolation in *D. innoxia*, 632
Vectorial OH^- transport, *Chara corallina*, 46
Vicia faba, polyphenol oxidation by chloroplast membranes, 1150
Vicilin synthesis, pea, 510
Vigna radiata
selenocysteine effect on enzyme activity, 758
selenomethionine incorporation, 182
Vigna unguiculata (L) Walp. (*see* Cowpea)

W

Water
flow, soil and plant resistance, 809
loss, effect of growth regulators, *Eucalyptus* and bean, 254
potential, growth-sustaining, corn root, 859
stress
abscisic acid accumulation and, *X. strumarium*, 672
betaine synthesis and, barley, 342
uptake, effect on leaf elongation, rice, 147
Water-relation parameters, in mesophyll cells of *K. daigremontiana*, 1155
Wheat
CO_2, O_2 and light effect on photosynthesis and photorespiration, 1032
cyanide insensitive O_2 uptake, 488
myo-[2-^{3}H]inositol and *scyllo*-[R-^{3}H]inositol metabolism in kernel, 740
Wheat germ agglutinin distribution, 950
Wheat grain, mineral storage, 494
Wormwood, senescence promotion, oat, 246
Wound-induced respiration and membrane lipid breakdown, 890

X

Xanthine dehydrogenase, light effect on *in vivo* activity, *Pharbitis*, 935
Xanthium strumarium, wilting, rehydration and ABA, 672
Xenobiotics, cytochrome P-450 reductase activity and, 600
X-ray study of element storage in protein body, wheat, 494
Xylem
sap in indication of N_2 fixation, soybean, 720
woody, thermal analysis for exotherms, 40

Z

Zea mays, photosystem II mutants, 18
Zea mays L., nitrate assimilation and accumulation of reduced nitrogen, 1179, 1184
Zea mays (*see* Corn)
Zein, as N sink, maize, 330
Zinc, electron transport inhibition, barley, 1174
